10 of the World's Newest and Best Patented Hybrid Tea Roses

Show
Girl

We are proud to be able to make available to our customers the world's finest Roses. Because of growing contracts with the country's leading Rose hybridizers, we have access to all the hundreds and hundreds of patented Roses. From this great number we select the very best to grow for our customers. Of this selected list we offer here 10 of the newest and best. Every one is a winner, and we know you will love them.

La Jolla (Pronounced La Hoya) **The Front Cover Rose**

This gorgeous new Rose—new for 1955—is certain to create a sensation! Next to its very unusual coloring (see front cover) the things we like best about La Jolla are the perfect form of the long, tapering buds, and its ability to perform well under widely varying conditions of soil and climate. A vigorous grower, the tall, stout canes with their big, glossy, attractive foliage will produce some of the first flowers of the season on exceedingly fine, long stems. Don't miss having this sure winner in your garden. Plant Patent No. 1103. \$3.00 each; 3 or more, \$2.65 each. We pay the postage.

SHOW GIRL

Probably Show Girl has the largest, yet most perfectly formed buds to be found in the Rose world. The huge buds are made up of large, heavy-textured petals and are long lasting. With us Show Girl is a bright, shocking pink. A yearly favorite with visitors to our gardens, we rate Show Girl and Curly Pink as our two best pink Roses. Plant Pat. No. 646. \$2.00 each; 3 or more, \$1.75 each. We pay the postage.

THE PRESIDENT'S COLLECTION

- 1 President Eisenhower
- 1 La Jolla
- 1 Sun Valley

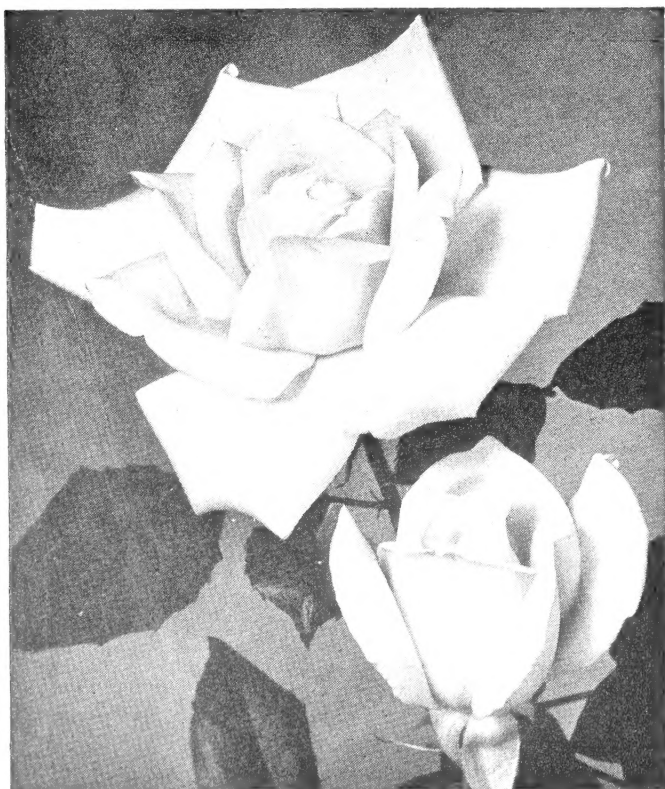

All 3 for

Only \$6.95 Postpaid

You Save \$1.05

CHRYSLER IMPERIAL

The 1953 All-America Award Winning Hybrid Tea Rose. Chrysler Imperial has a depth of color not often captured in a Rose. The red is a very deep, intense red. The huge blooms are borne singly on long stems making it a good Rose for cutting. A bouquet of Chrysler Imperial and Peace will take your breath away. Plant Pat. No. 1167. \$2.50 each; 3 or more \$2.20 each. We pay the postage.

Sun Valley

Chrysler Imperial

PEACE

We wish we had space to print all of the letters we have had from customers raving about their Peace Rose. It is impossible to show the exquisite beauty of Peace with a single photograph. You'll marvel at the dawn-like range of colors through which it passes. From the bud of golden yellow, etched with pink, it turns upon opening to a canary-yellow, then to a pale gold and finally to an irid-scent cream set off by the apple-blossom-pink edging. The huge, 5- to 6-inch blooms are borne on husky stems. **Peace is truly one of the greatest Roses of all time.** Plant Pat. No. 591. \$2.50 each; 3 or more, \$2.20 each. We pay the postage.

PRESIDENT EISENHOWER

A great new red Rose you'll not want to be without! The large buds slowly open to well formed, 4- to 5-inch, rich rose-red blooms. The blooms are borne singly on long, strong stems making it ideal for cutting. President Eisenhower was voted one of the two best red Roses in our gardens last summer. We want you to plant this lovely new Rose not because we like it, but because we know you'll like it. Plant Pat. No. 1217. \$2.50 each; 3 or more, \$2.20 each. We pay the postage.

MOJAVE

The top Rose of 1954, Mojave is certain to take its place alongside the greats in rosedom. Named for the famed Mojave Desert because its rich coloring is typical of a desert sunset—glowing orange shot with flame-like tones of scarlet and vermilion. A heavy producer of beautiful, tapering buds, we can promise you that Mojave will stand out in your garden—not just because of its color, but because of its splendid performance as well. Plant Pat. No. 1176. \$2.75 each; 3 or more, \$2.40 each. We pay the postage.

SUN VALLEY

A brilliant yellow that will sparkle in any garden. A clear, strong golden yellow that doesn't fade even in the hottest sun. A tall plant producing large, long lasting, delicately fragrant blooms on very long stems, ideal for cutting. Plant Pat. No. 1135. \$2.50 each; 3 or more, \$2.20 each. We pay the postage.

NOCTURNE

Long, tapering, cardinal-red buds, excitingly shaded with a darker crimson, distinguish this excellent variety. One of the best reds for this climate. Plant Pat. No. 713. \$2.00 each; 3 or more, \$1.75 each. We pay the postage.

Peace Collection

- 1 Peace
- 1 Chrysler Imperial
- 1 Show Girl

HELEN TRAUBEL

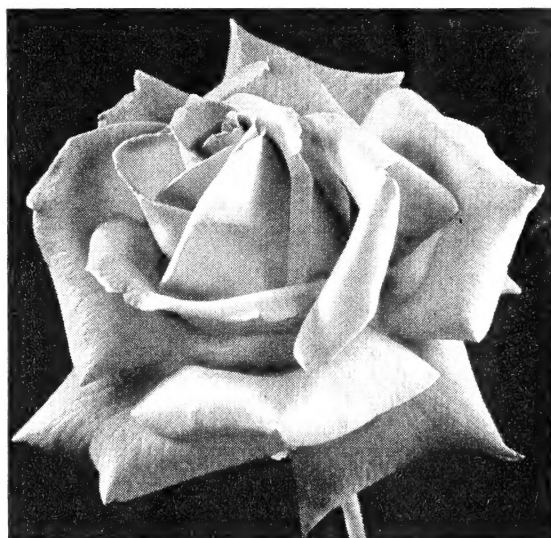

The exquisite form and delicate, changing color of Helen Traubel make it a favorite. Nearly always in bloom—sometimes a light sparkling pink, but more often a luminous apricot (its normal color). Helen Traubel does better in Minnesota than in milder areas. A sure-to-please Rose. Plant Pat. No. 1028. \$2.50 each; 3 or more, \$2.20 each. We pay the postage.

MCGREDY'S SUNSET

A jaunty Rose that is sure to captivate you. The outside of the petal is a clear buttercup-yellow tipped with orange, while the inside is chrome-yellow, flushed with scarlet as it opens. Plant Pat. No. 317. \$1.75 each; 3 or more \$1.55 each. We pay the postage.

SUB-ZERO

Hybrid Tea Roses

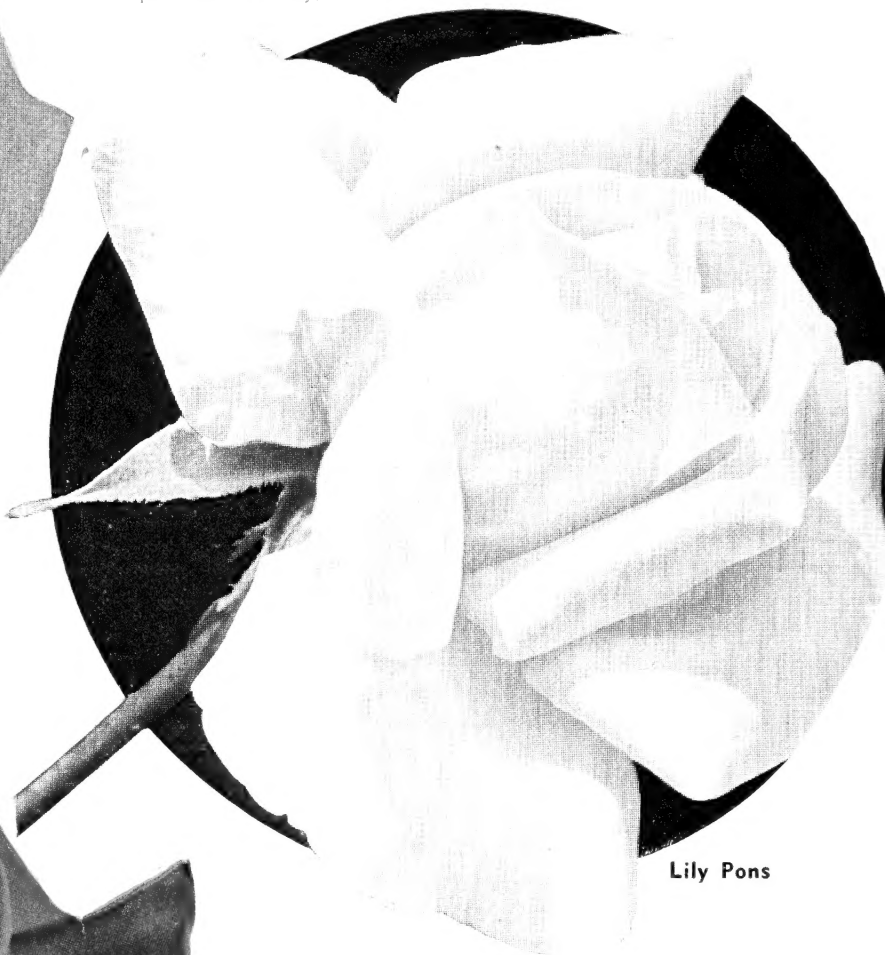

BRED FOR THE NORTH

Why You Too,
Should Grow
Sub-Zero Roses

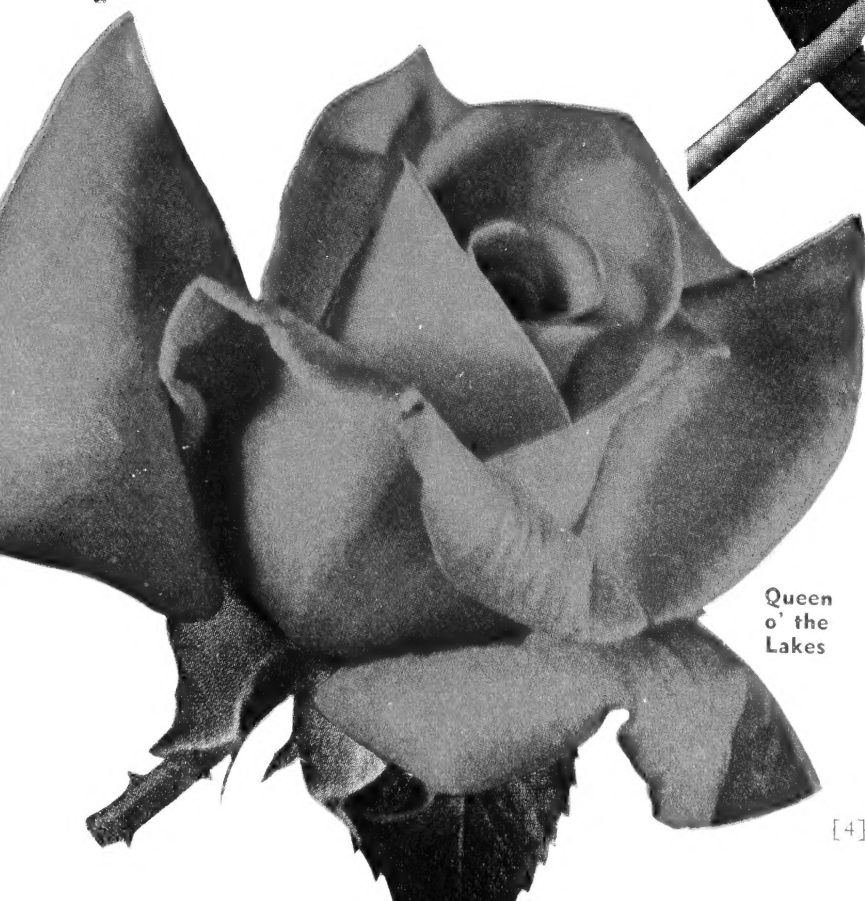

Sub-Zero Roses are beautiful, easy to grow—and are the hardiest of all Hybrid Tea Roses. This exciting type brings to you a new race of Hybrid Tea Roses equal to the best in form and color—but, being bred back to hardy strains, Sub-Zeros possess a great deal more hardiness. Greater hardiness means longer lived plants and more pleasure for you. For the northern gardener they should provide the framework of the Rose garden, although the best of the regular Hybrid Teas work very well with the Sub-Zeros to provide an even wider range of form and color. A good selection of Roses will produce more color and more pleasure over a longer period of time than any other flower that can be grown in this part of the country.

Tip Toes

Lily Pons

Queen
o' the
Lakes

QUEEN O' THE LAKES

This gorgeous, crimson queen of flowers was named in honor of the reigning Queen of the Minneapolis Aquatennial. One of the best red Roses, this lovely sub-zero is completely double, long lasting and prolific. Its grace and form will make it a high spot in your garden. Plant Pat. No. 1003. \$1.75 each; 3 for \$5.00. We pay the postage.

TIP TOES

Tip Toes is one of the favorites with visitors to our Rose garden—and is one of the highest rated of all Roses by the testers for the American Rose Society. The large flowers are a delightful mixture of red, orange and pink tints with an enjoyable spice-like fragrance. Very vigorous and free blooming. It never fails to please. Plant Pat. No. 849. \$1.75 each; 3 for \$5.00. We pay the postage.

V
for
Victory

V FOR VICTORY

The large, very double, clear yellow blooms combined with a lovely fragrance distinguishes V for Victory. Constantly in bloom, the strong yellow coloring doesn't fade, even in the hottest sun. Plant Pat. No. 543. \$1.75 each; 3 for \$5.00. We pay the postage.

ORANGE RUFFELS

A shade of orange never before captured in a Rose. This picture does not do it justice. From 40 to 50 petals on a flower gracefully curled and ruffled make this indeed a dazzling Rose as it blends from a lively orange to a saffron-yellow. Blooms heavily all summer long. The almost holly-like foliage is dark and glossy. The plant is a vigorous grower and is sure to please. Plant Pat. No. 1124. \$1.75 each; 3 for \$5.00. We pay the postage.

Orange
Ruffels

LILY PONS

The large, graceful flowers of Lily Pons are a glowing white with a soft lemon-yellow shading in the center. Very free flowering, Lily Pons will produce upwards of a hundred perfectly formed flowers in a season. We predict it will be a favorite with you just as it is with us. A real winner. Plant Pat. No. 420. \$1.75 each; 3 for \$5.00. We pay the postage.

Handsom Red

HANDSOM RED

Here is great Garden News!—Walter D. Brownell, the creator of the famous Sub-Zero strain of Hybrid Tea Roses, has finally released the Rose he feels to be his masterpiece. A new, glowing shade of velvety red has been captured in this new Rose that puts it in a class by itself. The intensity of the color, the shapeliness of the flower—and the fact that it is a Sub-Zero—made HANDSOM RED the "Rose of the year" in our gardens. Many of the Sub-Zero strains have very high ratings by the American Rose Society, and belong with the elite of the Rose world. We do not see how Handsome Red can fail to be acclaimed as a truly great Rose. You'll not want to be without this wonderful new Sub-Zero Rose, but please order early as our supplies are limited this first year. (Propagation rights reserved.) \$2.00 each; 3 for \$5.75. We pay the postage.

MORE SUB-ZERO ROSES

Curly Pink

CURLY PINK

One of the most amazing Roses we have ever known. It continues to out-bloom and out-perform any other pink Rose we have seen. Each stem produces from two to five huge, two-toned, lovely pink blossoms forming a gorgeous bouquet on a single stem. We have had reports of over 50 blooms on a single plant at one time. The Rose testers for the American Rose Society rate Curly Pink "Excellent"—and that's just what it is. Hardy, disease resistant, and probably the **easiest Hybrid Tea Rose to grow**. Plant Pat. No. 842. \$1.75 each; 3 for \$5.00. We pay the postage.

Lady Lou

Northern Lights **ROSE COLLECTION**

Here is a marvelous collection of some brilliant Sub-Zero favorites. For descriptions see pages 4 and 5.

- 1 Tip Toes

All 3 for \$5.00

We pay the postage.

Sun Up

LADY LOU

A new Sub-Zero we know you will want to try. Long, pointed buds open to medium-large double flowers that are highly fragrant and range in color from an intriguing jasper-red to a rose-opal. Plant Pat. No. 1059. \$1.75 each; 3 for \$5.00. We pay the postage.

SUN UP

Another new Sub-Zero Hybrid Tea Rose that we welcome into our Rose gardens. The individual blooms are large and very double. The color is a rich, clear shade of China-rose, reflecting a glorious brilliance. A heavy blooming Rose that is bound to please. Plant Pat. No. 1015. \$1.75 each; 3 for \$5.00. We pay the postage.

Special SUB-ZERO Collection

This collection enables you to get 1 each of all 9 Sub-Zero Roses illustrated on pages 4 through 6 at a special low price and a real saving. This will make a glorious showing in the full range of colors.

All 9 Roses for Only \$13.75

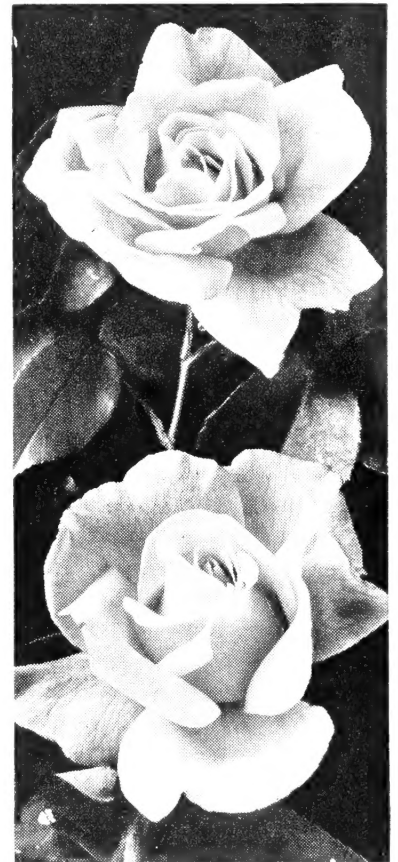

We pay the postage.

Climbing ROSES

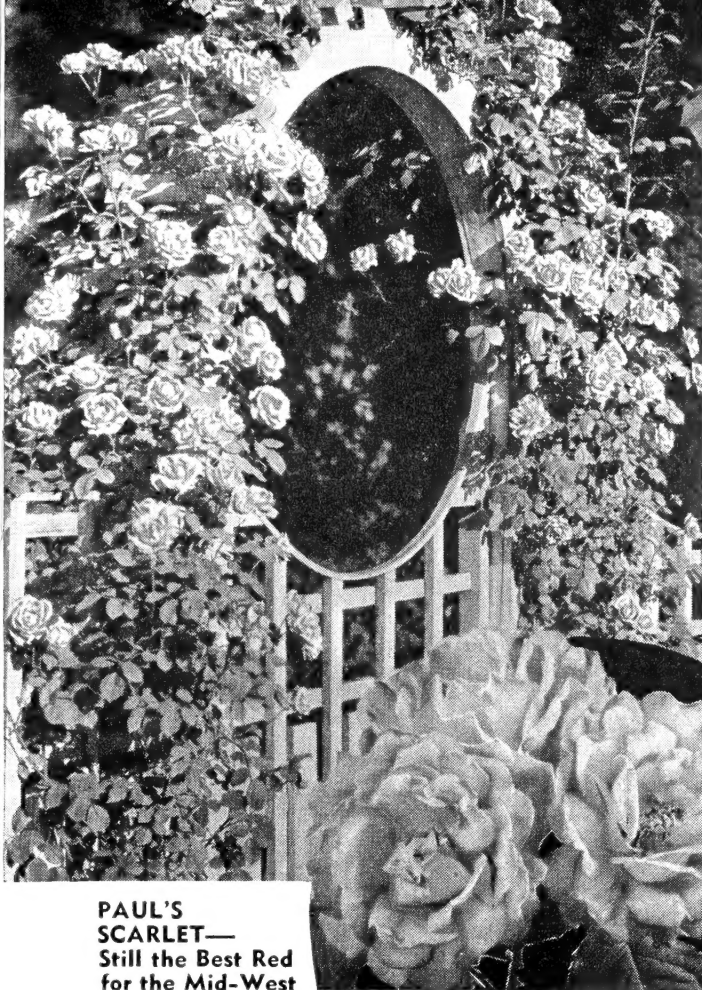

Climbing Roses will add loads of charm to any home. Allowed to climb up trellises against sections of the house or garage, where there are no windows, they will reduce bareness and create color and beauty you never knew before. Wonderful, too, trained over arbors or gateways.

GOLDEN GLOW a "Sub-Zero" Climber

Golden Glow will be welcomed by any lover of yellow Roses. Slower to come into bloom than most Climbing Roses, nevertheless, it is a true beauty and more than worth the wait. The blooms are a rich, deep, golden yellow that stand out like gems against the deep leathery green foliage. Golden Glow is very fragrant and when in bloom the spicy fragrance carries throughout the yard. Golden Glow is equally good on a trellis or as a ground cover. Plant Pat. No. 263. \$1.75 each; 2 for \$3.25. We pay the postage.

Golden Glow

PAUL'S SCARLET—
Still the Best Red
for the Mid-West

PAUL'S SCARLET

Still King of the reds, Paul's Scarlet is the most popular red Climbing Rose. Paul's Scarlet produces brilliant masses of vivid scarlet-red blooms that neither burn nor fade. \$1.35 each; 2 for \$2.45. We pay the postage.

NEW DAWN

The beautiful, very fragrant, shell-pink blooms of New Dawn have made it a favorite with gardeners everywhere. Blooms more abundantly than any other Climber we know except White Dawn. Blooms the first year planted. \$1.45 each; 2 for \$2.75. We pay the postage.

ALOHA

A sensational new everblooming pink Rose that bursts into bloom from top to bottom with large, deep rose-pink blooms. The coral-pink buds open the show and slowly unfold to huge blooms—up to 4 inches across. A new and very welcome pink climber. Plant Pat. No. 948. \$2.50 each; 2 for \$4.50. We pay the postage.

CLIMBER COLLECTION

New Dawn

WHITE DAWN

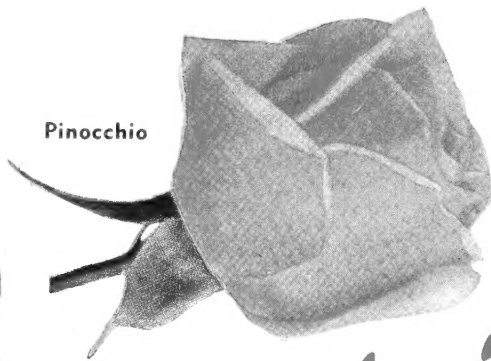

White Dawn blooms the first year planted—a feature we know you will like. Hundreds of pure glistening white, completely double blooms, resembling gardenias, are borne year after year. The most persistently blooming Climber we've ever seen. Developed from a cross between New Dawn and Lily Pons Sub-Zero Hybrid Tea by the University of Minnesota. White Dawn is truly America's finest everblooming white Climbing Rose. \$1.75 each; 2 for \$3.35. We pay the postage.

Lovely Floribundas

How to Use Floribunda Roses

Floribunda Roses are rapidly gaining in popularity, because of their many uses and abundance of bloom. They are striking when used in solid beds, either formal or informal. They add charm to the perennial border and are distinctive when used as edgings for walks or drives. They are also effective when planted at the base of Climbers, such as a pair of Red Pinocchio set at the base of White Dawn.

Red
Pinocchio

PINOCCHIO

This bold little Floribunda, the parent of many other excellent Floribunda Roses, will worm its way into your heart with its hundreds of jaunty, long lasting, miniature Tea Roses, 1½ inches across. All summer long great clusters of delicate salmon buds, flushed with gold at the base, gradually soften to clear pink as the little "sweetheart" flowers open and take on deeper pink edges. Pinocchio is incomparable for miniature flower arrangements and boutonnieres. Plant Pat. No. 484. \$1.50 each; 3 or more, \$1.30 each; 25 or more \$1.20 each. We pay the postage.

RED PINOCCHIO

Red Pinocchio is a favorite of almost everyone here at the nursery. Masses of delightfully fragrant Roses are borne in large, long-lasting clusters. The buds are a rich carmine taking on a velvety hue as the flowers open. They last an amazingly long time as cut flowers, too. Plant Pat. No. 812. \$1.50 each; 3 or more, \$1.30 each; 25 or more, \$1.20 each. We pay the postage.

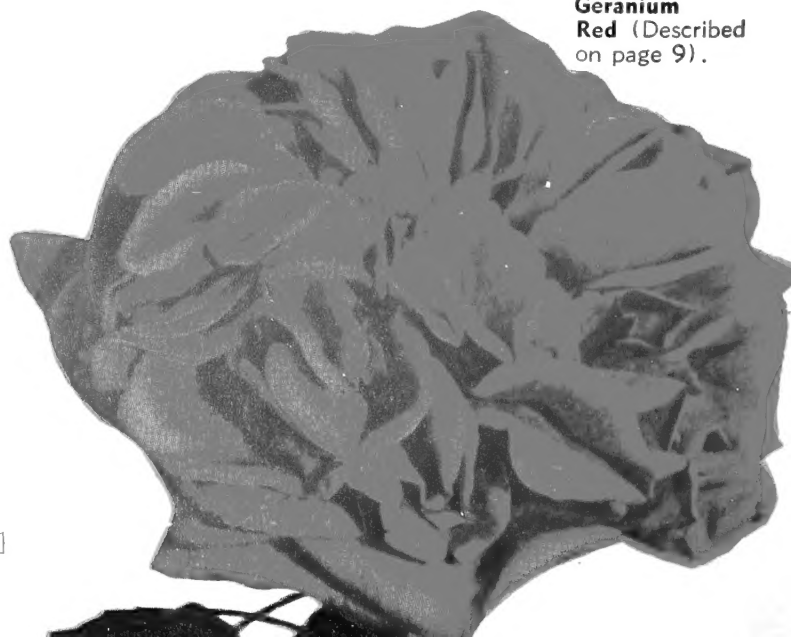

FROLIC

Frolic produces literally hundreds of lovely double blooms of a bright, clear pink and measuring about 2¾ inches across. The plant is very vigorous—will get to be 2 to 3 feet—and its ability to produce flowers almost down to the ground makes it just right for hedge or border planting. You will never need to worry about how many flowers you cut either, because there will always be plenty more. Plant Pat. No. 1179. \$2.25 each; 3 or more, \$2.00 each; 25 or more, \$1.80 each. We pay the postage.

Frolic—for continuous color, you can't beat it.

**Geranium
Red** (Described
on page 9).

Irene of Denmark

IRENE OF DENMARK

A clean frosty white, Irene of Denmark fills a long felt need for a better white Floribunda. The buds and opening blooms are of true "Sweetheart" form, and are as dainty as they are perfect. The blooms are completely double and very graceful. The plant is only 2 to 2½ feet tall and is really an eye catcher when planted with Valentine or Red Pinocchio. Plant Pat. No. 889. \$1.75 each; 3 or more, \$1.55 each; 25 or more \$1.40 each. We pay the postage.

GOLDILOCKS

This little 2½ foot Floribunda will be a source of continual amazement to you as it spills its hundreds of perfectly formed, double, golden yellow flowers into your garden. Our most popular yellow Floribunda Rose, Goldilocks is continuously in bloom. You'll not want to be without Goldilocks. Plant Pat. No. 672. \$1.50 each; 3 or more, \$1.30 each; 25 or more, \$1.20 each. We pay the postage.

Goldilocks

FASHION

We think Fashion is one of the finest Floribunda Roses ever created. A large mass planting in our Rose gardens has brought an immense amount of praise from visitors the past three years. The blooms begin in June and continue as a gay and joyous display until frost. The Oriental red buds slowly diffuse into a coral blended with gold as they open. Truly a champion.

Plant Pat. No. 789. \$2.00 each; 3 or more, \$1.75 each; 25 or more, \$1.60 each. We pay the postage.

GERANIUM RED

Here is an odd little fellow that we just love. Imagine a Rose the color of a Geranium. The blooms, large for a Floribunda—up to 4 inches across—resemble camellias in form. We wouldn't want to be without this one and we are sure you won't either once you see it. Relatively tall as Floribundas go, Geranium Red should be planted in the background, or where hedges around 2½ feet are wanted. Plant Pat. No. 811.

\$1.75 each; 3 or more, \$1.55 each; 25 or more, \$1.40 each. We pay the postage.

Fashion

VALENTINE

One of the brightest Floribundas you'll find is the new VALENTINE—with its flowers of a glowing *traffic-signal-red*. Appearing in huge clusters, the 2½-inch flowers cover the plant and, as one burst of bloom goes by, another quickly follows in rapid succession. Eventually the color does fade, but not until each burst of bloom has given you several weeks of the most brilliant garden color you can imagine. This is one of the desirable low-growing kinds so popular for hedge, border or foreground planting. It attains a height of 1½ to 2 feet. Plant Pat. No. 1029. \$1.75 each; 3 or more, \$1.55 each; 25 or more, \$1.40 each. We pay the postage.

F. J. Grootendorst

F. J. GROOTENDORST

A long time favorite, F. J. Grootendorst is treasured because of its sturdy, upright habit of growth and its everblooming habit. The small, cherry-red, carnation-like blooms are borne in clusters that smother the plant when in the peak of blooming season. Hardly without some flowers all summer long. Especially outstanding for hedge plantings because of its upright habit of growth and the fact that it can be easily trimmed to any height desired. If a large number are needed, write for prices on a smaller hedge size.

HANSA

An extremely hardy and vigorous everblooming Rose, excellent in group plantings and for 4 to 5 foot hedges. The large bright crimson blooms are borne abundantly.

Super-Hardy RUGOSA ROSES

PRICES: 2-yr., No. 1, field-grown plants, \$1.45 each; 3 or more, \$1.25 each; 12 or more, \$1.20 each. We pay the postage.

For extreme locations where other Roses will not do well, plant these super-hardy Roses—they will not fail. We think of Rugosa Roses as flowering shrubs—and as such they are truly outstanding. Use them in the planting around the house—or as a flowering hedge. You'll be amazed at how beautiful they are. They require no more care than any hardy shrub and their hundreds and hundreds of color blooms make them outstanding.

AMELIE GRAVEREAUX

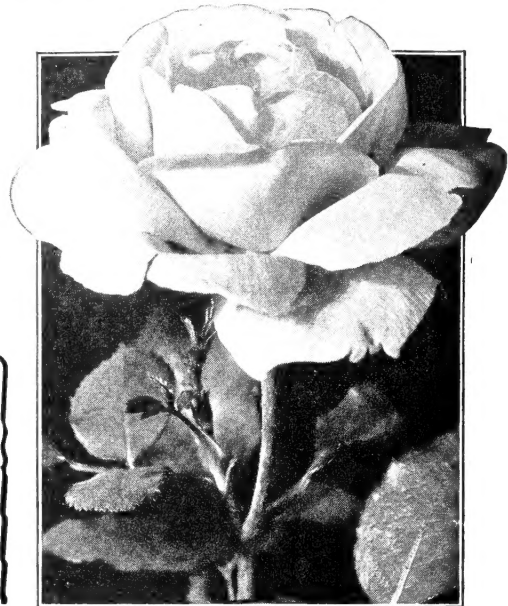

This is the best Rugosa Rose for cutting. The flowers resemble Hybrid Tea Roses in form as does the plant. The blooms are a rich carmine, double, and are borne on long stems, ideal for cutting. Requires no winter cover—absolutely hardy.

AUSTRIAN COPPER

This husky bush Rose is especially nice used in contrast to the others. Orange-scarlet petals with yellow on the back give this Rose a lovely coppery tone. Absolutely hardy and dependable.

DR. ECKENER

Large, two-toned red and yellow blooms, very similar to the Pres. Hoover Hybrid Tea Rose, make this a favorite in the Rugosa class. An excellent variety that is good for cutting.

Clematis

Plant VINES for Summer Charm

CLEMATIS

A favorite of almost everyone. Easier to grow than most people think, they are one of the most outstanding vines when they begin to pour forth their hundreds and hundreds of vivid flowers. They bloom all summer long. Complete directions for their easy culture accompany every order. Prices: \$1.75 each; 2 for \$3.25. We pay the postage.

JACKMANI. The most popular of all the large-flowering Clematis. Large, velvety, violet-purple flowers. Grows rapidly throughout the summer and early autumn.

HENRYI. The huge white flowers of Henryi often measure 8 inches across. A vigorous grower, it will grow to 8 feet high.

ANDRE. A gorgeous, glowing red. One of our best liked Clematis.

RAMONA. Soft delicate blue flowers that are large and borne heavily. A very good variety.

VEILLARD. One of the very best growers, Veillard produces hundreds and hundreds of gorgeous lilac-rose flowers. The color is more intense in cool weather. Veillard is a real producer.

BITTERSWEET

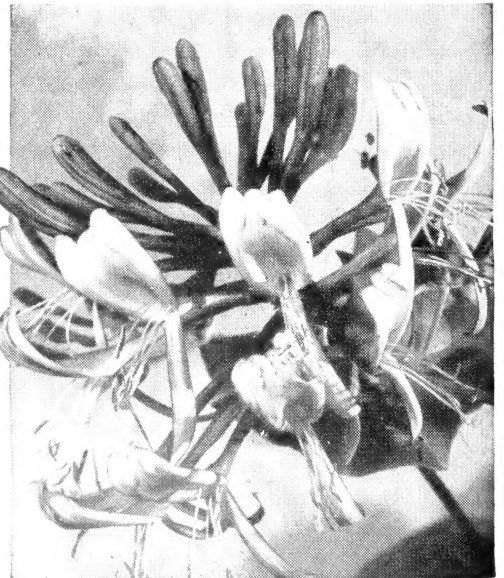

Grow winter bouquets of Bittersweet on your own back fence or arbor. June blooms are followed by attractive orange-red berries. Plant two or more for cross-pollination. Grows in any soil—absolutely hardy. 2-yr., select vines, 95c each; 2 for \$1.75. We pay the postage.

ENGELMANN IVY

This Ivy covers stone, brick or stucco walls without support. A handsome 5-leaf Ivy with extra thick, green foliage which turns a brilliant rich red in autumn. 2-yr., select vines, 95c each; 2 for \$1.75. We pay the postage.

GOLDFLAME HONEYSUCKLE

A delightful new vine with immense clusters of large, fragrant, flame-coral trumpets lined with creamy gold. Blooms abundantly from May until frost, reaching its full glory in early summer. Perfect on a trellis—excellent as a ground cover. 2-yr., select vines: \$1.35 each; 2 for \$2.45. We pay the postage.

Goldflame Honeysuckle

Andrews' Exciting New

PYRAMIDAL Flowering Crab Trees!

An entirely new type of Flowering Crab tree has all of us here at the nursery very excited. It is a type that grows in the general shape of a Lombardy Poplar, hence, we refer to them as "Pyramidal Flowering Crabs." We first saw specimens of this new type in Canada and were enthralled by their beauty and unusual outlines. It required little imagination to visualize their tremendous potential usefulness as a replacement for the Lombardy Poplar as a tree to use for screening off undesirable sights, to plant as a background on the side or back of a lot, as corner plantings for the home,

M. R. 454

The buds of M. R. 454 are a deep blood-red, opening late to rosy flowers that mature to a clear pink. The tree is literally smothered in bloom. It would be excellent even if it were not pyramidal in shape. 4-5 ft., \$3.65 each; 2 for \$6.85. 3-4 ft., \$2.95 each; 2 for \$5.65. We pay the postage.

KLEHM'S IMPROVED BECHTEL'S

This lovely flowering tree is greatly underrated—but not by those who have seen it. The branches are literally hidden by a spectacular display of delicate double pink flowers that look like miniature Roses. The only double flowering Crab tree that we have. Ideal for the smaller yard. An improved form of the old favorite Bechtel's Flowering Crab. 5-6 ft., \$3.65 each; 2 for \$6.95. 4-5 ft., \$3.15 each; 2 for \$5.95. 3-4 ft., \$2.65 each; 2 for \$4.95. We pay the postage.

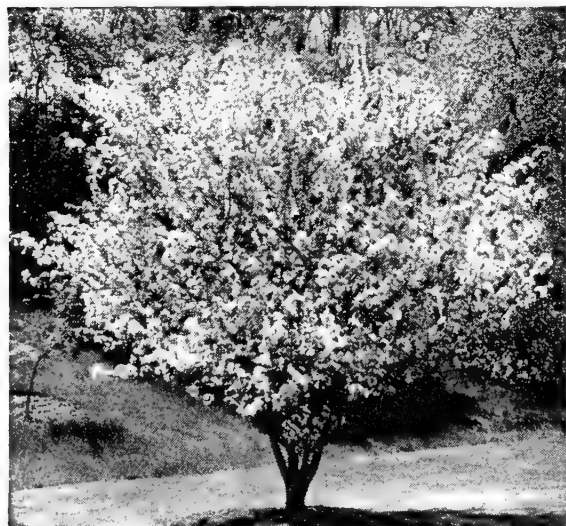

HOPA

Blood-red buds are followed by a mass of fragrant deep rose-colored blossoms. The leaves are first a reddish purple, then a bright rich green. Truly a striking tree. 5-6 ft., \$3.15 each; 2 for \$5.95. 4-5 ft., \$2.55 each; 2 for \$4.85. We pay the postage.

RED SILVER

This unusual tree gets its name from the color of its leaves. They are a deep red or maroon all summer, with somewhat of a silvering on the underneath side. The blooms are a deep red. A very colorful accent tree. 5-6 ft., \$3.15 each; 2 for \$5.95. 4-5 ft., \$2.55 each; 2 for \$4.85. We pay the postage.

Klehm's Improved Bechtel's

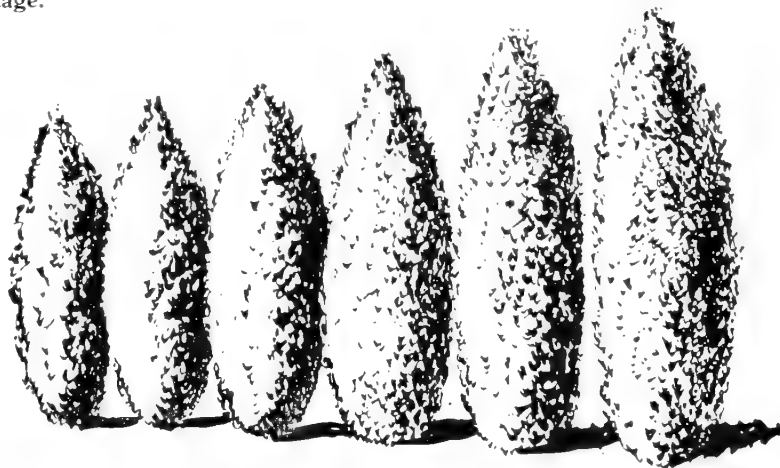

or for specimen ornamental trees in a small yard. We predict that it will be just a few years before they will have replaced the Lombardy Poplar as they are superior in many ways. They are smaller, although tall enough to be a good screen (10 to 15 feet); they are longer lived by far and last but not least, their beauty places them in a class by themselves. A row of these trees, when in full bloom from top to bottom, almost defies description and will make spring your most treasured season. Two of our best Pyramidal Flowering Crabs are M. R. 454 and Strathmore.

STRATHMORE

We like Strathmore for its foliage as well as for its habit of growth. The leaves remain reddish all summer and turn strikingly red and scarlet in autumn. The flowers resemble those of Hopa but are somewhat darker. 4-5 ft., \$3.65 each; 2 for \$6.85. 3-4 ft., \$2.95 each; 2 for \$5.65. We pay the postage.

- 1 Almey, 4-5 ft.
- 1 Klehm's Improved Bechtel's, 4-5 ft.

Both for Only \$5.95

We pay the postage.

In all our 83 years in the nursery business, we have never seen as sensational a Flowering Crab tree as Almey; nor have we ever seen a new introduction live up, so completely, to all its early promises.

Almey has huge dollar-size blooms of a rich, glistening, fiery crimson. Each petal has at its base, pure white markings that give the blossom the appearance of a five-pointed star surrounded by crimson. From a distance, however, this is not apparent and the tree looks as though it were a mass of flame.

Although not a large tree—about 12 to 15 feet—Almey is vigorous and attains its mature height quite rapidly. Another outstanding characteristic of Almey is that it blooms young. Every spring in the nursery the little trees—a year before they are large enough to sell—are in full bloom. While we hesitate to say that Almey will bloom the year you plant it, as the shock of transplanting is a lot to overcome and still flower—yet many of our customers have written telling us how happy they were when their Almey bloomed a few weeks after they planted it.

The spring show is not all. A graceful tree in growth, Almey also produces in profusion small scarlet fruits that are unique in their habit of clinging tenaciously to the branches long after the leaves have dropped, providing another high spot of color long into the winter.

We know you'll like Almey—so don't be without it any longer. Plant some this spring.

5-6 ft., \$3.95 each; 2 for \$7.65. 4-5 ft., \$3.35 each; 2 for \$6.35. 3-4 ft., \$2.85 each; 2 for \$5.45. We pay the postage.

*Flowering Crab Trees
Mean Spring*

The real coming of spring is heralded by the gorgeous Flowering Crab trees, as they spill their clouds of red and pink blooms onto the landscape to signal the passing of winter and the coming of another glorious spring. Flowering Crab trees are not only breath-taking in their spring dress, but very serviceable as small shade trees. Dress up your home grounds by planting some gay Flowering Crab trees this spring.

See page 11 for descriptions of 3 other regular Flowering Crabs as well as for description of the new class of Pyramidal Flowering Crabs.

Almey Flowering Crab
Today's most beautiful
flowering tree.

Modern Shade Trees for Modern Homes **MORaine LOCUST**

Sensational New Fast Growing Tree

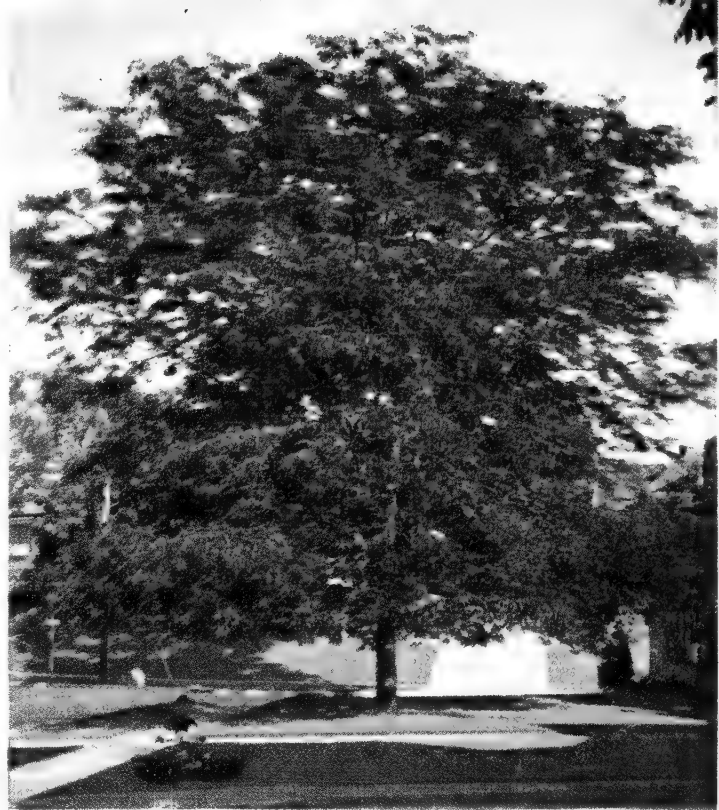

The **Moraine Locust** is the shade tree that couldn't be much better if it was specifically bred for the needs of today. For the many new homes that have no shade whatsoever, the **Moraine Locust** will provide shade quicker than any tree we know of. Yet, the **Moraine** is a good tree—long-lived, drought resistant, and will grow on any soil.

The **Moraine Locust** is today's shade tree because of the following features:

1. **Seedless.** Unlike other Locusts, the **Moraine** is sterile, thus there are no unsightly seedpods to clean up in the fall. Non-fruiting habit permits better foliage.
2. **Grows Anywhere.** Seems to produce good growth on any kind of soil, but responds favorably to extra feeding.
3. **Long-Lived.** A common Honey Locust recently cut down in Ohio proved to be 327 years old. There is every reason to believe that the **MORaine LOCUST**, too, will be a long-lived tree.
4. **Hardy.** Common Honey Locust is native from New York to Minnesota and from Texas to Ontario. The Minnesota Horticultural Extension Department recommends it throughout the southern half of Minnesota. The **MORaine LOCUST** should withstand the same extremes in temperature.
5. **Beneficial Effect on Lawn.** Due to good shape of the tree and the fine foliage, enough light filters through to permit growth of excellent lawns, but adequate shade to prevent growth of crab grass.

We know of no other shade tree that possesses the many fine features of the **MORaine LOCUST**. It more adequately fills the needs of today than any other tree. For shade in a hurry, plant **MORaine LOCUST**. Plant Patent No. 836. Price: 5-6 ft. whips, \$5.00 each; 2 for \$9.75.

Crimson King Maple

Moraine Locust—A very fast grower

HARD or SUGAR MAPLE (Picture Above)

One of the finest and most colorful of all the Maples—a beautiful shade or boulevard tree. Brilliant yellow, orange or scarlet foliage in the fall. A stately, compact and graceful tree. 6-8 ft., \$6.45 each; 2 for \$12.65. 5-6 ft., \$4.75 each; 2 for \$9.25.

CRIMSON KING MAPLE

This new tree is causing a sensation. A form of Norway Maple, the **Crimson King** is unusual in that the leaves come out in the spring the brightest crimson you've ever seen. As the summer wears on, the leaves gradually turn to a deep, rich maroon. For color throughout the entire summer, **Crimson King** is by all odds the leader. Plant Patent No. 735. 5-6 ft. whips, \$4.95 each; 2 for \$9.65.

Grafted American Elm

ELM, Grafted American

America's most popular shade tree. Large and spreading, it combines strength and grace. One of the best lawn or park trees—majestic, hardy, permanent. These are grafted Elm selected for their uniformity, good shape, and faster growing habit.

	Each	2 for
8-10 ft.	\$5.25	\$10.25
6- 8 ft.	4.15	8.00

Cut-Leaf Weeping Birch

The Birches

These delightful trees are not valued as much for shade as they are for their gracefulness. Outstanding for accent points, their comparatively small size makes them useable in almost any yard.

BIRCH, White

A beautiful tree for your lawn. Has slender, graceful branches, deep green foliage, and paper-white bark. In the fall the leaves turn an attractive yellow. Summer or winter it contrasts effectively in clumps near or among evergreens.

	Each	2 for
6-8 ft.	\$4.25	\$8.25
5-6 ft.	3.15	6.00
18-24 in.	5 for	\$1.00

BIRCH, Cut-Leaf Weeping

You'll find grace, charm and beauty combined in this popular tree. Has silvery white bark, graceful drooping branches, and small, finely cut leaves. Emphasizes the compact lines of evergreens. Grows best in moist locations. Very attractive when planted in groups of two or three.

	Each	2 for
7-8 ft.	\$6.25	\$12.25
6-7 ft.	5.75	11.25
5-6 ft.	5.25	10.25

MAPLE, Schwedler

A beautiful tree; ideal for color accents in spring and fall. Its crimson leaves in spring contrast with the usual vivid greens. Gradually the colors soften to bronze-green in summer; then to a deeper waxy green. Has the same round, symmetrical shape as its parent, the Norway Maple. A long-lived, hardy tree that will enrich your home landscape.

	Each	2 for
7-8 ft. whips	\$4.85	\$9.45
6-7 ft. whips	4.35	\$8.45

MAPLE, Norway

Very popular because of its pleasing, familiar, dome-shaped head densely covered with beautiful dark green foliage. Lovely autumn foliage of rich yellow and orange hangs on the tree 2 weeks longer than on any other Maple. Well adapted to city conditions. Fine for street or lawn planting.

	Each	2 for
7-8 ft. whips	\$2.75	\$5.25
6-7 ft. whips	2.45	4.65

LINDEN, (Basswood)

A beautiful specimen tree with a round, compact top, large, heart-shaped leaves that give dense shade.

	Each	2 for
6-8 ft.	\$4.95	\$9.65
5-6 ft.	3.45	6.65

WILLOW, Niobe Weeping

A graceful weeping tree for lawn or beside a rock wall. Has golden yellow bark, narrow green leaves, silvery beneath and long drooping branches.

	Each	2 for
6-8 ft.	\$2.50	\$4.75
5-6 ft.	2.00	3.75

SHADE TREE COLLECTION

1 Moraine Locust 1 Crimson King Maple

Both for Only \$9.65

The Poplars

The Poplars have been steadily growing in popularity. Excellent for tall screens and accent points. Can be used at corners of tall houses, and to line driveways for farm homes.

POPLAR, Lombardy

Tall, stately landscape tree for accent points, quick screens, backgrounds and driveways. Very picturesque and very useful. Has glossy leaves that shimmer in the sunlight. Branches grow close to trunk and upright to form a tall, slim column. Fast growing and hardy.

	Each	2 for
8-10 ft.	\$1.60	\$3.00
6- 8 ft.	1.35	2.50
5- 6 ft.	1.10	2.00

POPLAR, Bolleana

(Silver-Leaved). Beautiful landscape tree that resembles the Lombardy Poplar in shape, but is hardier and longer lived. Has deeply lobed leaves with a white facing that gives a delightful silver flash in the breeze.

	Each	2 for
6-8 ft.	\$3.75	\$7.25
5-6 ft.	2.40	\$4.55

ELM, Chinese

A hardy Siberian strain that grows fast even in poor soils. However, the Chinese Elm is not a good shade tree, and with the recent introduction of the Moraine Locust, the need for fast growing trees—yet good trees—can now be satisfied.

	Each	2 for
6-8 ft.	\$2.75	\$5.25
5-6 ft.	1.85	3.45

MOUNTAIN ASH

A beautiful, semi-dwarf specimen tree with creamy white flowers followed by clusters of orange-red berries.

	Each	2 for
6-8 ft.	\$5.95	\$11.65
5-6 ft.	4.55	8.85

Bolleana Poplar

Farmers! Save FEED, FUEL — and lots of back-breaking shoveling with an Andrews Planned Farmstead Shelterbelt

Are you tired of plowing through snow to get to the barn? Are you tired of shoveling to get your car out of the yard after a heavy snow that has blown and drifted all night? You don't have to, you know. Farmers who have an ANDREWS PLANNED farmstead shelterbelt tell us they wouldn't sell it for 10 times what it cost. More beef, more milk, more eggs are produced, too, when your feed lots and barns are protected from the wind. Farmstead shelterbelts are not really an expense, but an investment that will make your life more pleasant and your stock more productive. Use our FREE shelterbelt planning service. Tell us how much space you have or how many rows (and length of inside ones) you want and we will design a shelterbelt with no obligation to you. It's a service we can give and we want you to have.

Laurel-Leaf Willow—4 years after planting

WE PAY THE POSTAGE On All Windbreak Stock
Deciduous and Coniferous

EVERGREENS

GREEN ASH

Very dependable—will grow on almost any soil. A dense grower that is durable and drought resistant.

	25	50	100	200
18-24 in.	\$1.80	\$3.30	\$5.95	\$11.25
12-18 in.	1.50	2.75	4.95	9.35

AMERICAN ELM

Beautiful, long-lived and drought-resistant. Recommended by the State of Minnesota for windbreak work. We use North Dakota seed for extra hardiness.

	25	50	100	200
18-24 in.	\$1.80	\$3.30	\$5.95	\$11.25
12-18 in.	1.50	2.75	4.95	9.35

CHINESE ELM

Branches from the ground up. A good selection where only 1 or 2 rows are wanted and the soil is poor.

	25	50	100	200
2- 3 ft.	\$3.15	\$5.75	\$10.45	\$19.75
18-24 in.	2.25	4.15	7.45	14.00

HONEYSUCKLE

Ideal for outside row of windbreak or for snowtrap. Very bushy—branches from ground up, stopping ground sweep of wind. Grows 8-10 feet tall. Hardy as a rock.

	25	50	100	200
18-24 in.	\$3.70	\$6.85	\$12.45	\$23.55
12-18 in.	3.40	5.45	9.95	18.65

HONEY LOCUST (Thornless)

A very fast growing, hardy tree, ideal for windbreak plantings where it is on the dry side, although adequate moisture will produce even more growth. A very pretty tree. We prefer it to Chinese Elm and recommend it as more desirable.

	25	50	100	200
2- 3 ft.	\$2.65	\$4.65	\$8.35	\$15.95
18-24 in.	1.90	3.35	5.75	10.95
12-18 in.	1.65	2.75	4.75	8.95

NORWAY POPLAR

An outstanding tree for shelterbelt or woodlot plantings. Starts giving protection the second year. Very hardy and good source of fence posts and lumber. Grows anywhere.

	25	50	100	200
3- 4 ft.	\$5.95	\$10.85	\$19.75	\$37.35
2- 3 ft.	4.65	8.45	15.35	29.00
18-24 in.	3.95	6.85	12.45	23.55

RUSSIAN OLIVE

A very pretty tree, with silvery green leaves that branch from the ground up, making it valuable in the "snowcatch" rows of the shelterbelt. The fragrant yellow flowers are followed by berries that are liked by birds.

	25	50	100	200
12-18 in.	\$2.95	\$5.35	\$9.75	\$18.45

LAUREL-LEAF WILLOW

This "Cornland Willow" is one of the very best trees for shelterbelt work provided the soil is good. Branches heavily from ground up. Leaves are a deep, glossy green that cling to the tree late into the fall. Plant where soil is good and moisture is adequate.

	25	50	100	200
2- 3 ft.	\$3.75	\$6.85	\$12.45	\$23.55
18-24 in.	3.10	5.65	10.25	19.35

URAL WILLOW

This excellent shrub is ideal for use in the snowcatch or for outer row in shelterbelt. Branches profusely and from ground up. Very graceful and beautiful. Leaves have a bluish color. Hardy as a rock.

	25	50	100	200
12-18 in.	\$2.25	\$4.35	\$7.85	\$14.85
6-12 in.	1.50	2.75	4.95	9.35

AMERICAN ARBOR-VITAE

This thick, compact evergreen is an excellent tree for the inside rows of the shelterbelt provided the soil is on the heavy side and moisture is adequate. Equally good for hedges or screens.

	10	25	50	100
4-yr. trees, 12-18 in. transplants	\$3.50	\$7.35	\$13.35	\$24.65

DOUGLAS FIR

This tree has everything you need for a good shelterbelt evergreen. It's hardy—a very fast grower—with thick, dense foliage. It will grow anywhere except in very wet soil. We believe it is one of the very best for shelterbelt and reforestation work.

	10	25	50	100
3-yr.-old trees, 10-14 in. seedlings	\$2.60	\$5.85	\$10.45	\$19.85

NORWAY PINE

Fast growing and hardy. Minnesota's State tree—the Norway Pine—is very ornamental as well as useful. It closely resembles the White Pine in appearance, but is not subject to blister rust.

	10	25	50	100
4-yr.-old trees, 12-16 in. transplants	\$3.75	\$7.85	\$14.35	\$26.65

WHITE SPRUCE

One of the very best Spruces for shelterbelt work. A compact grower that is hardy and drought resistant.

	10	25	50	100
8-12 in.	\$3.00	\$6.25	\$11.85	\$22.65

Norway Poplar—3 years after planting

Big and Beautiful

These Gorgeous BEGONIAS

will Amaze You

Few flowers surpass, for pure beauty, these newly developed Tuberous-rooted Begonias. They have huge double blooms closely resembling the lovely Camellia of southern gardens; perfectly formed and carried on long stems.

The best of all flowers for shady locations. Ideal for planting on the north side of the house or under trees where few things do well.

These Begonias can be potted early in March and started in the house to be set outside when the weather permits. Begin this spring to grow your own corsages. We know you will love them.

DEAR FRIENDS:

In 1872, our Grandfather started Andrews Nursery. Since then he, his sons, and now we, have made thousands of friends throughout the United States - all because we've built this business on one idea - we want you to be a satisfied user!

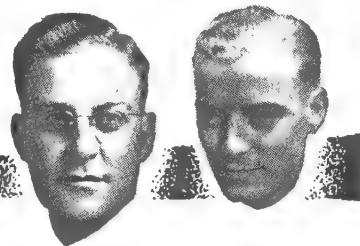

We take special pride in developing and growing this nursery stock, realizing that our customers will also appreciate each item we have so carefully grown. When we receive a letter from a customer we throw out our chests just a tiny bit when we read about the wonderful results he or she has had with our nursery stock.

If, by chance, you have not as yet purchased any nursery stock from us, why don't you try us this spring? We are confident that if you will try us just once, you will keep coming back year after year for other plants and trees that will beautify your home.

As our Grandfather said, "The proof of the pudding is in the eating - and the proof of our plants and trees is in the growing. Not in our nursery, but IN YOUR YARD, GARDEN OR ORCHARD."

If you are not 100% satisfied with any item you receive from us, don't hesitate to let us know - we consider your satisfaction to be just as important to us as the production of the finest quality nursery stock.

Most cordially yours,
KIM and DICK ANDREWS

OUR Guarantee TO YOU

"A good customer is a satisfied customer." Since 1872, that's been our policy. We guarantee that every single item of nursery stock you receive from us will arrive in good growing condition. If it doesn't, we'll replace it immediately at absolutely no cost to you.

We pack your shipment very carefully, but if it should arrive damaged, and if it went by express or freight, we'd appreciate receiving your express or freight receipt with a statement from the agent showing loss or damage so that we can file a claim with the transportation company.

If by chance, a tree, shrub or plant, received from us, dies during the first growing season, we want to be fair. We'll replace it at one-half the cost to you. We want you to be pleased with your purchase. We merely ask that you make your report and have your replacement order in our hands by October 15th following date of shipment.

Every item in this catalog is true-to-name. We guarantee it as such. If by chance an item should prove to be something other than you purchased, you will receive a free replacement or your money will be cheerfully refunded. Of course, as you understand, we can't be liable for any damage other than that mentioned above. However, when you receive Andrews Nursery stock, it's guaranteed to be in good growing condition.

KIM and DICK ANDREWS

why buy by mail?

That's a question that thousands of folks who have bought trees and plants from Andrews Nursery would gladly answer.

Here's what they'll say:

You make your selections from a complete, fully-illustrated catalog, at your leisure, permitting more careful decisions.

The whole family gets in on the fun, sitting around on winter evenings, making plans together for your spring planting.

You have the convenience of shopping by mail . . . which places all the modern facilities of Andrews Nursery as close as your mailbox. (You can tramp over our hundreds of acres just sitting in your arm chair).

And perhaps most important of all, you are assured of receiving top quality plants and trees in their prime. That's because our modern storage, with strict humidity and temperature control, keeps this stock fresh and in excellent growing condition until it is shipped.

All of these are sound reasons for buying your plants and trees by mail from Andrews Nursery. Our eighty year reputation for furnishing good, sound, high vitality plants . . . together with our straightforward guarantee of satisfaction — promises that new customers, as well as old, will be completely pleased.

we pay postage

No need for you to wonder how much shipping charges are going to be. We pay the postage or express charges on everything in this year's catalog, except for a very few items. Shade and ornamental trees, and large quantity raspberry purchases are sent Express Collect. If your order includes both prepaid and not prepaid items, we will send the entire order Express Collect, provided it can be shipped together, but will include with your order, FREE, some selected items which will be of greater value than the shipping charges of the prepaid items. Of course, if you would prefer to have the prepaid and not prepaid items sent separately, simply let us know and we will follow your instructions.

how to order

Order early while assortment is still complete. Your plants will be reserved and shipped at planting time.

Money can be sent safely by Post Office Money Order, Express Money Order or Bank Draft. If necessary to send currency or silver, be sure to register. Please add 10¢ to personal checks. Full payment should be sent with orders of less than \$10.00. Stock for larger orders will be reserved if 1/2 the amount is sent with the order and balance before shipment; or if desired we will ship C. O. D. for balance when a deposit has been made on an order.

FREE BONUS PLANTS FOR EARLY ORDERS

PLACED BEFORE MARCH 15th

Early orders help avoid the "planting-time-rush" and are much easier for us to handle. We want to pass this saving on to you by giving you **Free Bonus Plants**. If you send us your order for nursery stock before March 15th, you may select one premium from the list at the right for each \$5 of your order. For example: If your order totals \$5, you may select one premium; if it totals \$10, you may select two, and so on.

BONUS PLANTS

		Value
①	1 Choice French Lilac (our choice of color)	\$1.65
②	10 Glad Bulbs (Mixed colors)	1.25
③	1 Choice Rose Bush (our choice of variety)	\$1.35 to 2.00
④	1 Meteor Pie Cherry	1.45
⑤	2 Fredonia Grapes	1.00
⑥	2 Baby Lombardy Poplar	1.20
⑦	1 Prince George's Flowering Crab (New! Double pink flowers)	2.00

We reserve the right to change Bonus Plants when supplies of those requested are exhausted. List second choice if you desire.

The complete book of GARDEN MAGIC—the super gardening guide with 495 pages of "garden magic" ideas and illustrations sells for \$3.95. It is one of the best gardening books we've ever read. It covers every phase of gardening and is written in non-technical language. We know you'll treasure it—and it makes a wonderful gift for a gardening friend. On orders totalling \$15.00 or more at regular catalog prices you may have "The Complete Book of GARDEN MAGIC" for only \$1.00 (a saving of almost \$3.00) postpaid to you. This outstanding offer is in addition to the Bonus Plants for early orders listed above—and is available until June 15th, 1955.

the BEST in Gardening Aids - - -

TRI-GEN ROSE SPRAY

One of the best ALL PURPOSE Rose Sprays. Contains an insecticide, fungicide and a plant stimulant. Guards roses from all pests.

Kit E (enough for 6-10 roses for all summer)\$1.65
Kit A (enough for 12 - 20 roses)\$2.50

KRILIUM—the MIRACLE SOIL CONDITIONER

If your soil is that pesky, clay-type which bakes hard as a brick in the sun or turns to soup in the rain . . . you need Krilium soil conditioner to turn it into loose crumbly porous soil that plants grow and thrive in. Krilium, in one application produces ideal growing structure 3 to 6 inches deep in the worst clay-type problem soils. Complete directions on each container. Price: 1 lb. can \$1.50; 5 lb. can \$4.95. Postpaid

A NEW CHERRY PITTER

We have found an excellent little Cherry and Olive Pitter that does an excellent job in the home kitchen. It pits all kinds and sizes of cherries, cherry-plums and ripe olives. The pit is removed with a minimum of bruising to the fruit. It is fast, simple to operate, clean and efficient. We know you'll like it. \$1.25 each, postpaid.

GEIGY ROSE DUST —or ROSE SPRAY

You'll have bigger, better and healthier roses if you use GEIGY'S ROSE DUST. It's simple—just dust on the plant or mix with water and spray. Made by one of the world's largest chemical companies, this dust protects your roses—and other flowers—from BOTH insects and diseases.

1 lb. \$1.48; 3 lbs. \$3.45 postpaid

GEIGY

GARDEN DUST

The best all-purpose vegetable garden dust we've seen. Equally effective as dust or spray. Contains newest approved chemicals for vegetable garden use. Complete directions on container.

1 lb. \$1.48
3 lbs. \$3.45
Postpaid

Fruit Tree SPRAY

The best packaged fruit tree spray on the market. Controls completely all diseases and insect pests of most all fruits. Complete directions on each can. Contains Methoxychlor, Malathion and Captan. Just mix with water.

1 lb. \$1.89
3 lbs. \$4.65
Postpaid

GARDENING BOOKS

ANYONE CAN GROW ROSES\$2.00

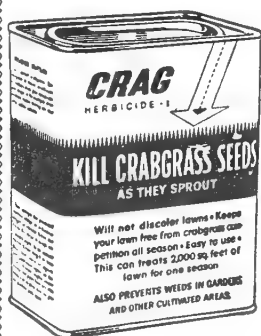

A simple complete guide for growing roses. Best book on roses we've seen.

The Complete Book of GARDEN MAGIC\$3.95

All you need to know to have your ideal garden.

Better Homes and Gardens, GARDEN BOOK\$3.95

A very complete and well illustrated garden guide. All Postpaid.

A New CRABGRASS Control - - that is Better, Safer and More Efficient

CRAG Herbicide-1 Kills Crabgrass Seeds as They Sprout

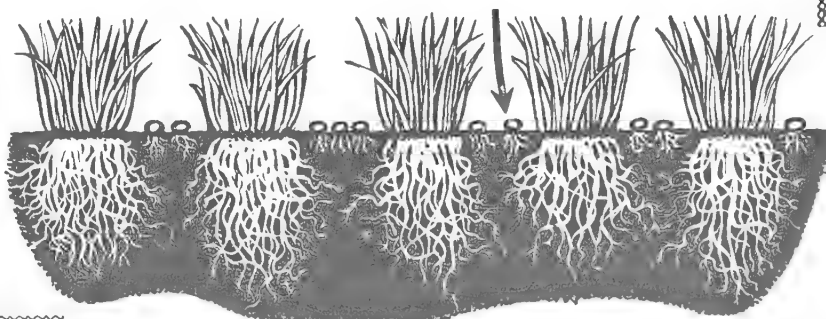

Now there is a method of fighting crabgrass that is easy, safe and reliable. Crabgrass is an annual, the seeds germinating in the spring and early summer. By mid-summer it starts to crowd out the regular lawn grasses, making an unsightly lawn. Bare spots in the lawn result if the established crabgrass is killed by chemicals, or when it dies out naturally in the fall.

But you need not even have Crabgrass—even if your lawn was riddled with it last summer. CRAG Herbicide-1 works wonders because it doesn't allow the crabgrass to become established—it kills the seeds AS THEY START TO GERMINATE. This means, of course, that CRAG Herbicide-1 must be applied early—between May 15th and June 1st depending on your location, and more than one application is recommended as crabgrass seed germinates over quite a long period.

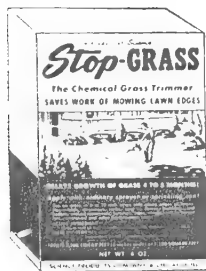

A 4-oz. box will treat 500 square feet, and a pound can will treat 2000 square feet—for the whole season. This is the best crabgrass control we have seen. It's so easy and so effective; and you get complete easy-to-follow directions. So use CRAG Herbicide-1 and have a rich green lawn all summer.

CRAG Herbicide-1 is ideal for use in gardens, shrub borders and around evergreens. In fact, the U. S. Dept. of Agriculture first approved of CRAG for strawberries, for which crop hundreds of commercial growers are now using it. Reduces hand hoeing up to 90%. A 4-oz. can treats 3000 square feet and a 1-lb. can treats 12,000 (120 x 100) square feet of garden for one application. Complete directions with each order. This year garden the easy way—with CRAG Herbicide-1.

1 pound package \$4.49 postpaid
4 oz. can 1.50 postpaid

New Chemical GRASS TRIMMER

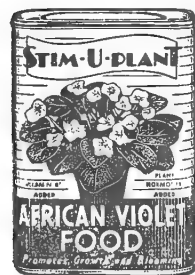

Saves Work of Mowing Lawn Edges

No more back-breaking work of cutting and trimming lawn edges on your hands and knees in the hot summer sun! Let STOP-GRASS do it for you! Just spray on grass edges early in the Spring, wait a week, then cut and trim just ONCE, that's all! You won't have to trim that grass edge again for MONTHS . . . because it will grow so very slowly that, for all

practical purposes it doesn't grow at all! The grass remains short and beautifully green! STOP-GRASS slows down the rate of growth, has no effect on roots, and drift will not harm flowers, shrubs, or trees.

Use STOP-GRASS in places where grass is hard to mow and requires mechanical edging. Use it in 6 to 12 inch strips on grass along edges of lawns, flower-beds, driveways, curbs; next to hedges, fences, walls, buildings; around ornaments, furniture, trees, shrubs, cemetery plots and monuments. STOP-GRASS is recommended only for edging because the average homeowner does not have the special equipment required for accurate application to large areas such as lawns.

1½ oz. Stop-Grass treats 800 ft., 6 in. wide
(400 sq. ft.)\$1.00 postpaid
4 oz. Stop-Grass treats 2200 ft., 6 in. wide
(1100 sq. ft.)\$2.25 postpaid

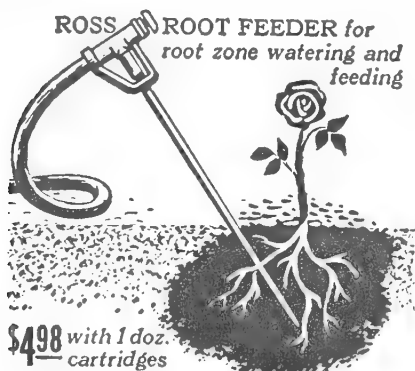

AFRICAN VIOLET FOOD

A complete balanced diet tailored especially for those gorgeous African Violets. Just mix with water. Clean, odorless, effective.

3 oz. can 69¢ postpaid.

ROSS ROOT FEEDER

Ideal for watering and feeding all deep rooted plants such as evergreens, shade trees, shrubs, and even roses. Water is put in the root zone, and gives faster more efficient watering and feeding. Use it once and you'll never be without it. Price includes 12 plant food cartridges.

\$4.98 with 1 doz. cartridges

Extra Cartridges \$1.00 per dozen

SNAP-CUT PRUNERS

A sturdy, well built pruning shears. We use this kind in the nursery and have found it to be very satisfactory.

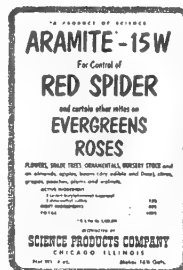

Large 8" Shears \$2.95 postpaid.
Ladies 6" Shears \$2.45 postpaid.

Grow BIGGER BETTER Berries with BERRY-SET

BERRY-SET makes berries grow much larger—often 50% to 100% BIGGER, MEATIER and SWEETER. Sprayed berry plants bear ripe fruits over a longer period of time; therefore you'll enjoy a longer season and greater value from your berries. Easy to use—just mix with water and spray on the flowers. Use on strawberries, raspberries and blackberries. 1 ounce makes 4 gallons.

1 oz. pkt. 50¢

3 oz. pkt. \$1.00
Postpaid

ARAMITE-15W

Kills RED SPIDER

on: Evergreens, Roses, Flowers
Shade Trees and Tomatoes

If you notice your evergreens getting brown, chances are they are being plagued by Red Spiders, which will also bother roses, shrubs, beans and tomatoes. For a quick, complete kill, mix Aramite 15-W with water and spray thoroughly.

4 oz. pkt. (makes 16-2/3 gals.) \$1.00 postpaid

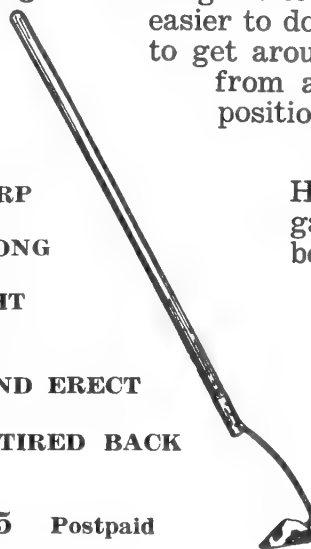

CARCO-X, the All-Purpose "Garden Protector".

You will improve your vegetable garden tremendously if you use the CARCO-X spray program. The best seeds and fertilizer cannot off-set the effect of soil insects that destroy the seeds or young plants before they get started. CARCO-X will give positive protection to your garden during this critical time. CARCO-X is a complete liquid spray, easy to use and not harmful to humans or animals when used according to directions. It acts 4 ways: as a soil treatment, a protective repellent, a contact insecticide and a fungicide. Mixes 1 to 100 or 1 to 200 with water—so it goes a long ways. ½ pint \$1.35; 1 pint \$1.85; 1 quart \$2.85; 1 gallon \$7.75. All postpaid. Send for it early, have it on hand at all times. A very effective glad bulb treatment.

The Original ALL PURPOSE HOE

Here is a garden tool that you'll keep under lock and key after you have used it just once. Even though it is light it is exceptionally well built and will last for years even under heavy use. This excellent hoe is made right here in Faribault, and we have been using it in the nursery for years. Its light weight and large amount of sharp cutting edge makes it easier to do hand work in the garden. It's simple to get around, in between and along side plants from a comfortable standing position.

With the All-Purpose Hoe you will hoe your garden quickly and not be tired when you are through. Don't be without this wonderful garden tool this summer.

PERENNIAL Favorites

Hardy Carnation

A Hardy Crimson CARNATION

The gay and jaunty Carnation is one of the nicest perennials we have. They make good border plants and the crisp, bright flowers are excellent for bouquets or for wearing in the lapel. Set plants 12 inches apart and mulch lightly during the winter. Each 65c; 3 for \$1.60; 5 for \$2.15; 10 for \$3.85. We pay the postage.

Astilbe

Six Famous CUSHION MUMS

Have bushels and bushels of gorgeous Mums to glorify your garden this fall. These lovely Cushion Mums in six favorite colors will amaze you with their hundreds of brilliant, long lasting blooms. Plants are small and can be planted in front of shrubs or evergreens around the house or, if given a place in your garden, will provide a brilliant autumn show at a time when most everything else is through blooming. If plants are set 18 inches apart, the ground will be completely covered in a sea of bloom by autumn.

COLORS

Red	Lavender	Bronze
White	Yellow	Pink

PRICES—Your Choice of Colors:
3 for \$1.60; 6 for \$2.60; 12 for \$4.65;
24 for \$7.95. We pay the postage.

Red Cushion

Andrews' Dazzling PHLOX

Phlox has long been a garden favorite. We have selected some of our choice varieties to offer—and we feel they are some of the very best in their color class.

WORLD PEACE. Pure white.

CHARLES CURTIS. Deep salmon.

DR. MAYO. White with red eye.

PROGRESS. Blue with white eye.

FARRINGTON. Pink.

LEO SCHLAGETER. Red.

THOR. Rose.

3 for \$1.65; 5 for \$2.15. We pay the postage.

BONUS PHLOX COLLECTION

1 each of all 7 varieties listed

For ONLY \$2.65

We pay the postage.

Yellow Cushion

Bronze Cushion

The Amazing ASTILBE

For an unusually bright spot in your yard, nothing will equal the Astilbe—and it will be a delight for years because it is perfectly hardy. The beautiful flowers on sturdy stems bloom in June and July and last a long time. They are excellent for use in bouquets. Astilbe has, perhaps, the handsomest foliage of any perennial, making it very attractive even when not in bloom. It grows 15 to 18 inches tall with flower spikes held well above the foliage. A clump of three or five planted about 15 inches apart in the perennial garden, along the base of a rock wall, or as hedge outlining a terrace or patio will be very striking. Prices: 70c each; 3 for \$1.80; 5 for \$2.75. We pay the postage.

DWARF EVERBLOOMING BLEEDING HEART

One of the choicest perennials, this lovely dwarf Bleeding Heart blooms all summer long. The plant is perfectly round and the fern-like foliage is magnificent. Absolutely hardy. 70c each; 3 for \$1.80. We pay the postage.

CORALBELLS

Coralbells have long been a favorite in the perennial garden. The dark green mound of leaves makes a perfect base for the tall spikes that carry the many dainty, bell-shaped, coral-red flowers. A very charming perennial that we can recommend without reservation. 65c each; 3 for \$1.60; 5 for \$2.15. We pay the postage.

Andrews' Beautiful Shrubs

Plant these colorful, hardy shrubs to beautify your home and also as an investment. A few dollars spent for shrubs to enhance the beauty of your home grounds not only makes it a much pleasanter place in which to live, but greatly increases the value of your property.

Some shrubs are planted for the beauty of their flowers; others for color and texture of foliage, and many to border the property or screen out objectionable views. The shrubs listed in this catalog are the best varieties and are grown for you by Andrews in this northern climate. Buy with confidence from a northern grower.

Variegated
Dogwood

The DOGWOODS

VARIEGATED LEAF DOGWOOD. A very colorful shrub with red branches and two-tone leaves of green, with a cream-colored border. The contrast when planted with green leaf shrubs is most attractive. The white flowers are in clusters each spring. It will grow well in a shaded location. 2-3 ft., \$2.70 each; 3 for \$7.90. 18-24 in., \$2.00 each; 3 for \$5.80.

RED TWIG DOGWOOD. The bright red color of the branches is quite showy during the growing season, but especially so when the ground is covered with snow. Each spring many clusters of white flowers are in abundance. Grows well in sun or shade. 2-3 ft., \$1.45 each; 3 for \$4.15. 18-24 in., \$1.10 each; 3 for \$3.10.

FORSYTHIA (Golden Bell). One of the few yellow flowering shrubs. The blossoms appear in early spring when the leaves are only about half size. Very attractive but should be given winter protection in this area. 2-3 ft., \$1.45 each; 3 for \$4.15. 18-24 in., \$1.10 each; 3 for \$3.10.

COTONEASTER. A medium size shrub that is one of the best for shady spots. The leaves are very dark, glossy green. Tolerates trimming very well so may also be used for a hedge. 2-3 ft., \$1.60 each; 3 for \$4.60. 18-24 in., \$1.25 each; 3 for \$3.55.

RED FLASH (Cistena). The red leaves on this shrub are especially attractive because they provide contrast when planted with green or golden leaf shrubs. This is the best of the medium sized red leaf shrubs. Full sunlight produces the brightest color. 2-3 ft., \$2.45 each; 3 for \$7.15. 18-24 in., \$2.00 each; 3 for \$5.80.

JUNE BERRY. Early each spring this shrub is completely covered with clusters of white flowers followed by blue berries. These blue berries are edible and make delicious pies and muffins. 18-24 in., \$1.35 each; 3 for \$3.85. 12-18 in., \$1.10 each; 3 for \$3.10.

DWARF NINEBARK. This dense growing shrub has many uses. Very good for planting near the foundation of your house, in the shrub border or as a hedge. May be grown as an untrimmed specimen or trimmed to any desired height. 2-3 ft., \$1.35 each; 3 for \$3.85. 18-24 in., \$1.10 each; 3 for \$3.10.

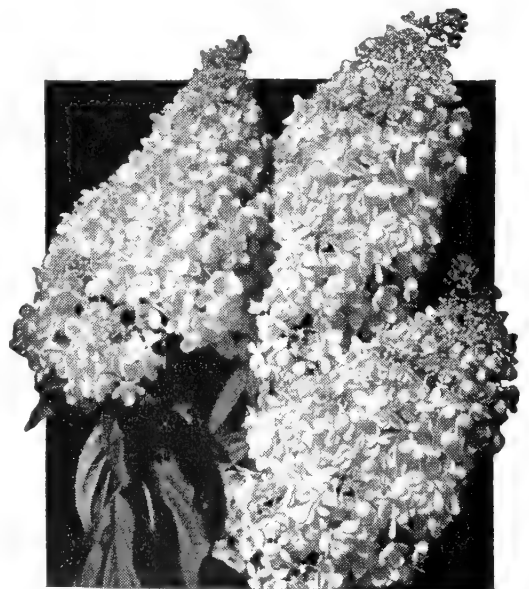

Hydrangea, Hills of Snow

HYDRANGEAS

HYDRANGEA, Hills of Snow. One of the few shrubs that blooms very well in a shaded spot. The large white flower heads during the middle of summer look like huge snowballs. 18-24 in., \$1.35 each; 3 for \$3.85. 12-18 in., \$1.10 each; 3 for \$3.10.

HYDRANGEA P. G. The extra large, conical flower clusters are snow-white for a long period, then change to a beautiful pink. Especially valuable because they are in bloom after most shrubs have finished flowering. Plant in full sun for best results. 2-3 ft., \$1.45 each; 3 for \$4.15. 18-24 in., \$1.15 each; 3 for \$3.25.

Hydrangea P. G.

GREEN LEAF BARBERRY. Another dwarf shrub of dense growing habit. Often used as a planting to protect evergreens, or as a hedge. The small, sharp thorns discourage small animals from trespassing. Red berries in the fall are especially bright after snowfall. 18-24 in., \$1.05 each; 3 for \$2.95. 15-18 in., 85c each; 3 for \$2.35.

RED LEAF BARBERRY. The only dwarf, red leaf shrub. The contrast when planted with evergreens gives life and brilliance to the planting. Growing habit is the same as the Green Leaf Barberry but should be planted in good sunlight for a bright red color. It also has many red berries in the fall. 15-18 in., \$1.35 each; 3 for \$3.85. 12-15 in., \$1.10 each; 3 for \$3.10.

TAMARIX. This shrub grows 5 to 6 feet tall and is clothed in fine, fern-like, silver-blue foliage. As an accent shrub, among those with larger leaves, it is most outstanding. The attractive red flowers appear in August. 2-3 ft., \$1.45 each; 3 for \$4.15. 18-24 in., \$1.15 each; 3 for \$3.25.

French Lilacs

ROSE TREE OF CHINA. Brilliant, double, pink flowers literally hide the branches just as the leaves begin to appear early each spring. The Rose-like flowers are almost identical to those of the Flowering Almond, but the plant is much hardier and more satisfactory in this northern area. It may be grown as a single specimen or grouped with other shrubs. The average height is 5 to 6 feet. For early spring brilliance it surpasses all others. 3-4 ft., \$3.25 each; 3 for \$9.45. 2-3 ft., \$2.45 each; 3 for \$7.15.

CORALBERRY. For that shady spot and for attractive red berries during the winter, plant this medium size shrub. It will give you perfect satisfaction in both summer and winter. 2-3 ft., \$1.10 each; 3 for \$3.10. 18-24 in., 85c each; 3 for \$2.35. We pay the postage.

SNOWBERRY. This medium size shrub grows equally well in sun or shade. The clusters of waxy white berries cling to the branches long after the leaves drop in the fall. 2-3 ft., \$1.10 each; 3 for \$3.10. 18-24 in., 85c each; 3 for \$2.35. We pay the postage.

Rose Tree of China

LILACS

There are different types of Lilacs, but things they all have in common are beautiful flowers, good foliage and hardiness. Lilacs have the most beautiful and fragrant flowers of all the flowering shrubs.

FRENCH LILACS. The French Lilacs have been developed in a wide variety of colors. The double flowering varieties with large blooming clusters are most popular. The French Lilac is long lived, does not spread from the roots and becomes more beautiful year after year.

CHARLES JOLY. A beautiful double dark red.

CHARLES X. A lovely single rose-red. Outstanding.

KATHERINE HAVEMEYER. Huge, double blooms of a lovely pink.

MICHAEL BUCHNER. Double. Blooms of a soft pinkish lilac.

ALPHONSE LAVALLE. Huge, double, violet blooms.

PRES. GREVY. Double, light blue. A wonderful grower.

MME. LEMOINE. Free blooming, double, snow-white blooms.

1 MME. LEMOINE	
1 ALPHONSE LAVALLE	
	18-24 in. All 3 for only 5.65

CHINESE LILAC. A new improved variety often called Red Persian or Rothomagensis. The lacy, dark red flowers are very numerous each spring. This Lilac is especially desirable for a hedge because trimming actually improves the appearance of the plant. 2-3 ft., \$1.60 each; 3 for \$4.60. 18-24 in., \$1.35 each; 3 for \$3.85.

VILLOSA LILAC. This is the tallest growing of all the Lilacs and it also has the largest leaves. The light pink flowers are in bloom later than the other varieties. This handsome, extremely hardy shrub is especially useful for screening objectionable views or buildings. It is also recommended very highly for windbreak planting. 2-3 ft., \$1.45 each; 3 for \$4.15. 18-24 in., \$1.20 each; 3 for \$3.40.

HONEYSUCKLE ZABELI. Newest and best of all the Honeysuckles. The dark red flowers make it the favorite. A tall growing shrub to plant as a background for smaller plants or to screen objectionable views. May be grown in its natural form or kept trimmed at any desired height as a hedge. 2-3 ft., \$1.50 each; 3 for \$4.30. 18-24 in., \$1.25 each; 3 for \$3.55.

MOCKORANGES

GOLDEN MOCKORANGE. Few shrubs are as outstanding, or draw as much attention as this golden leaf shrub. It is considered a dwarf because it grows only 3 to 4 feet tall, about half the size of other Mockoranges. This dense growing shrub has golden or chartreuse leaves, making a bright contrast with other shrubs. This aristocrat of shrubs is very desirable also for use in front foundation plantings. It may be trimmed and maintained at most any height to fit its location. The single blossoms are delicate white. 15-18 in., \$2.25 each; 3 for \$6.50.

VIRGINAL MOCKORANGE. Beautiful double, white, fragrant flowers resembling Gardenias are in profusion in early spring and an occasional cluster of flowers is borne throughout the summer. A narrow, upright shrub with good dark green foliage that adds interest to your planting. 2-3 ft., \$1.70 each; 3 for \$4.90. 18-24 in., \$1.35 each; 3 for \$3.85.

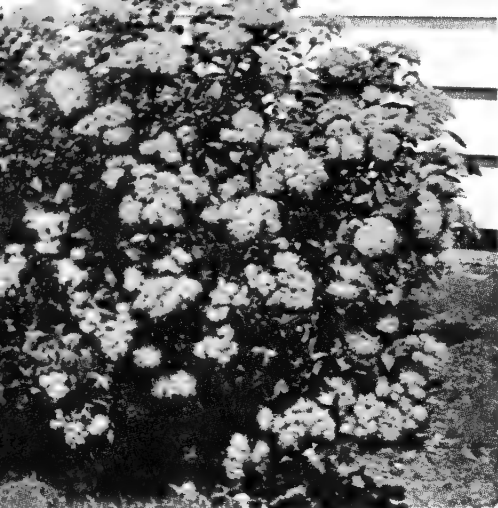

CORONARIUS—or Sweet Scented Mockorange. The blossoms of this shrub resemble Orange blossoms in appearance and fragrance, and for that reason it is called "Mockorange." A tall shrub that, although one of the older varieties, is still a favorite. The branches, smothered in bloom, are very desirable for spring bouquets. 2-3 ft., \$1.35 each; 3 for \$3.85. 18-24 in., \$1.10 each; 3 for \$3.10.

SNOWFLAKE MOCKORANGE. The most double-flowering of all the Mockoranges. Several layers of sweet-scented petals in each blossom give it the appearance of a huge snowflake. When in bloom the plant looks like a snowbank. A very attractive tall plant for a single specimen or for use with other tall shrubs in the border planting. One of the few patented shrubs. Plant Pat. 538. 2-3 ft., \$1.95 each; 3 for \$5.65. 18-24 in., \$1.65 each; 3 for \$4.75.

Virginal Mockorange

Honeysuckle
Zabeli

Spirea Froebeli

SPIREAS

The name Spirea is perhaps better known than that of any other shrub, but some people still think it means only Bridal Wreath. Actually there is a vast difference in the varieties; some are very dwarf, growing only 18 to 24 inches tall; others medium size; and some tall. The pink and red flowering varieties are some of the most widely used shrubs today.

ANTHONY WATERER SPIREA. This dwarf shrub seldom grows taller than 18-24 inches. The red flower heads, 2 to 3 inches wide, blanket the shrub in early spring and additional flowers appear during the summer months. Attractive green foliage turns to autumn colors with the first frost. 15-18 in., \$1.35 each; 3 for \$3.85. 12-15 in., \$1.20 each; 3 for \$3.40.

FROEBELI SPIREA. Large, deep pink flower clusters, excellent foliage, plus the fact that this shrub grows only 2 to 3 feet tall make it very popular. Used extensively in the foundation planting or in front of large shrubs in the border. The leaves turn from green to purple-red in autumn. 18-24 in., \$1.15 each; 3 for \$3.25.

SNOWGARLAND SPIREA. Each spring clusters of tiny white flowers are borne by the hundreds on the branches before the shrub is in full leaf. The lacy, light green leaves lend distinction to this shrub that usually grows 3 to 4 feet tall. 18-24 in., \$1.15 each; 3 for \$3.25. 12-18 in., \$1.00 each; 3 for \$2.80.

BILLIARDI SPIREA. The tall spikes of rosy red flowers, towering above the foliage, are very showy and entirely different from all other Spireas. Where a 4 to 5-foot shrub is desired, it is very satisfactory. 2-3 ft., \$1.25 each; 3 for \$3.55. 18-24 in., \$1.00 each; 3 for \$2.80.

VAN HOUTTEI SPIREA (Bridal Wreath). This old favorite seems to grow and bloom well in most any location. The white wreaths of flowers completely cover the plant each spring. It is also an excellent shrub for an informal hedge. 2-3 ft., \$1.00 each; 3 for \$2.80. 18-24 in., 85c each; 3 for \$2.40.

VIBURNUMS

Few people are familiar with this family of shrubs because they are known by many different names. Features all the Viburnums have in common are excellent foliage, extreme hardiness, good blossoms, and attractive berries.

ARROWWOOD (Viburnum dentatum). An upright-growing, nicely shaped shrub for foundation planting as well as in the border. Small, dark green leaves make this shrub neat in appearance all season. In early spring small white flowers, in clusters about 3 inches across, are quite numerous, followed by many blue berries that remain on the plant for months. Foliage turns to shades of red and purple in autumn. 2-3 ft., \$1.65 each; 3 for \$4.75. 18-24 in., \$1.35 each; 3 for \$3.85.

WAYFARING BUSH (Viburnum lantana). The large, round, dark green, leathery leaves are very attractive and remain on the plant long after killing frosts. The white flowers in clusters, nearly 4 inches across, appear in June, followed by red fruit later turning to hard black berries. A good shrub for the tall border, especially between shrubs with small leaves. 2-3 ft., \$1.75 each; 3 for \$4.95.

HIGHBUSH CRANBERRY (Viburnum trilobum). Like the other Viburnums the foliage is outstanding. The large, heavy textured leaves are shaped like a Maple leaf, and turn to brilliant autumn colors in the fall. Most outstanding feature is huge clusters of bright red berries that follow the large white flower heads borne in the spring. Berries remain on the plant long into the winter. Use as an accent shrub in the border or as an untrimmed hedge for screening purposes. This shrub withstands smoke of the cities that many will not tolerate. 18-24 in., \$1.50 each; 3 for \$4.30.

SNOWBALL (Viburnum opulus roseum). This is the old-fashioned Snowball that is still in demand. The perfectly round, white flower clusters have the appearance of a snowball and are borne in large numbers on a single plant. Many use it as a single specimen plant, but it is equally good when three or five are planted in a group in the shrub border. This is one Viburnum that does not have berries following the blossoms. 18-24 in., \$1.50 each; 3 for \$4.30. 12-18 in., \$1.20 each; 3 for \$3.40.

Highbush Cranberry

Burning Bush

BURNING BUSH

We feel that this is the best of all deciduous shrubs. It is absolutely hardy, grows equally well in sun or shade, and can be maintained at any height desired by trimming. The branches appear to be square instead of round, due to the corky wing growth. The long, narrow, dark green leaves of summer turn to blazing crimson in autumn. An excellent shrub for planting near the house foundation or as background for rose or perennial beds. 18-24 in., \$2.95 each; 3 for \$8.45. 15-18 in., \$2.15 each; 3 for \$6.15. We pay the postage.

RUSSIAN OLIVE

A tall shrub for the corner of the rear yard or for screening. The leaves are a silvery gray, adding contrast when planted in back of green or red foliage shrubs. 18-24 in., \$1.10 each; 3 for \$3.10. 12-18 in., 75c each; 3 for \$2.15. We pay the postage.

WEIGELA, EVA RATHKE

A medium size shrub with good foliage and very attractive, trumpet-shaped, red flowers in the spring. In any shrub planting it adds distinction and color. 2-3 ft., \$1.65 each; 3 for \$4.75. We pay the postage.

2 New Pie Cherries

We feel that two of the most important introductions of the Minnesota Fruit Breeding Farm are the two pie Cherries offered here—Meteor and Northstar. The importance of these introductions is more easily realized when we remember that these Cherries are not just improvements upon existing fruits, but are entirely new fruits, a type that heretofore has been too tender to be grown in this area.

When a new type of fruit is made available by the plant breeders, we are willing to accept a variety that is not equal to existing kinds in warmer parts of the country, as long as it is hardy enough to grow and produce. However, with Meteor and Northstar, we are getting two new and hardy pie Cherries that are actually superior in quality to existing varieties being grown elsewhere in the country. That is why we feel that Meteor and Northstar are two of the Minnesota Fruit Breeding Farm's most important introductions. We are certain that in the years ahead these two Cherries will be widely planted throughout the entire country. They are extremely hardy—and for quality, they are tops.

Northstar

✓ NORTHSTAR ★★★

Full-sized Cherries of outstanding quality borne on a small tree is the story of Northstar. The color of the fruit is at first a bright fiery red, but as the fruit ripens the color turns to a deep mahogany-red. The pit is small and easily removed. The Cherries ripen long before any other pie Cherry is available—about July 5th to 10th in the Minneapolis area. Both parents of Northstar being smaller trees than the standard pie Cherry—Montmorency—there is every indication that Northstar will be a medium to small tree, ideal for the small yard.

PRICES

	Each	2 for
2½-3 ft.	\$2.95	\$5.75
2-2½ ft.	2.45	4.75
18-24 in.	1.95	3.75

We pay the postage.

✓ METEOR ★★★

Meteor is a cross between Montmorency and an extremely hardy Russian Cherry. The result is a very hardy pie Cherry with better color and flavor than Montmorency. To all of you who love Cherry pie, let us point out that these two new pie Cherries are so flavorful and so highly colored that you do not need artificial coloring nor any aid to bring out the flavor as you do with the pie Cherries now on the market. For tops in flavor and tops in quality, plant Northstar and Meteor. Meteor is a larger tree, and consequently can produce more fruit. So, where room is not a factor, plant Meteor; where space is limited, plant Northstar—but for the best Cherry pie you ever tasted, plant one or the other this spring. Meteor fruits later than Northstar, and both are self-fertile.

Meteor

ORNAMENTAL HEDGES

A living hedge is not only more attractive than a fence but only a fraction of the cost. To establish the property line or to serve as a barrier, nothing equals a beautiful green hedge either trimmed or growing in its natural form. In the following list are varieties for every purpose.

Dwarf Blue Leaf

DWARF NINEBARK. An exceptionally fine plant that may be kept at a height of 18 inches up to 3½ feet or, if left untrimmed, will form a dense hedge 4 to 5 feet tall. Plant 12 inches apart.

DWARF BLUE LEAF. The bluish green foliage is most striking in contrast with a green lawn. This hedge may also be grown as a trimmed dwarf hedge or as a taller informal one. Plant 12 inches apart. Very hardy and unusual.

GREEN BARBERRY. Considered a dwarf because it rarely grows over 3 feet tall. May be trimmed and kept at most any height desired. The thorns are an advantage in discouraging dogs from trespassing. Plant 12 inches apart.

HONEYSUCKLE. For a taller, trimmed hedge, from 3 to 6 feet, or a tall untrimmed hedge, this beautiful plant has no equal. The red blossoms in spring add much beauty to your grounds. Plant 30 inches apart.

CHINESE HEDGEWOOD. A fast growing, rugged shrub that may be maintained at any height, from 3 to 8 feet, by trimming. Recommended usually where a large hedge is desired. Plant 12 inches apart.

Honeysuckle

Evergreen Hedge

ARBOR-VITAE. An evergreen hedge is a great asset to any home grounds. As a trimmed hedge from 3 to 6 feet tall, or grown in its natural form, it is equally attractive in summer and winter. Nothing equals the Arbor-Vitae for a hedge of year round beauty. Plant 2 feet apart.

Giant, Juicy **PLUMS** and **PRUNES**

Tree-Ripened in your own back yard

Why pay high prices for Plums shipped in from distant areas—of necessity picked green and ripened enroute—when you can have better ones picked orchard-fresh from your own trees? The true flavor and sweetness of a Plum comes into it during its last few days of ripening on the tree. Until one has enjoyed the hearty goodness of a fully ripened Plum, he really can't appreciate this wonderful fruit. Tree-ripened Plums are mouth-watering when canned, too. Plum trees are not large and can be used effectively in the landscape border, especially such varieties as Mt. Royal, Stanley Prune and Superior. Plant a tree or two this spring. They bear young so you won't have long to wait.

Stanley Prune

The Giant Pipestone Plum

PLUM PRICES (Except Mt. Royal and Stanley)

4-5 ft.	\$1.90 each; 3 for \$5.35
3-4 ft.	1.50 each; 3 for 4.25
2-3 ft.	1.20 each; 3 for 3.35

We pay the postage.

➤ **PIPESTONE.** For a taste treat you'll never forget, just try a huge, juicy Pipestone Plum. Very large, Pipestone has few equals when picked sun-ripened directly from the tree. You'll say: "It's the best yet."

➤ **SUPERIOR.** Another huge, delicious red Plum as large as any ever shipped in from California. Rich sweet flavor, unexcelled for eating fresh—and it peels like a Peach. Relatively small tree—ideal for any place where space is limited. Not recommended for northern Minnesota.

➤ **REDCOAT.** Perfectly freestone, Redcoat is one of our best Plums for canning. Has medium sized, bright crimson fruit of excellent quality. Bears young and heavily.

➤ **MT. ROYAL.** The hardiest European Plum. Many people consider Mt. Royal to be the highest quality Plum that can be grown in Minnesota. The fruit is medium in size, an attractive deep blue, firm yet juicy and **FREESTONE.** A medium sized tree that is ideal for the small yard. Self-fertile so can be planted alone. It isn't as big as some of the others—but it does have the quality. 3-4 ft., \$1.90 each; 2 for \$3.65; 3 for \$5.35.

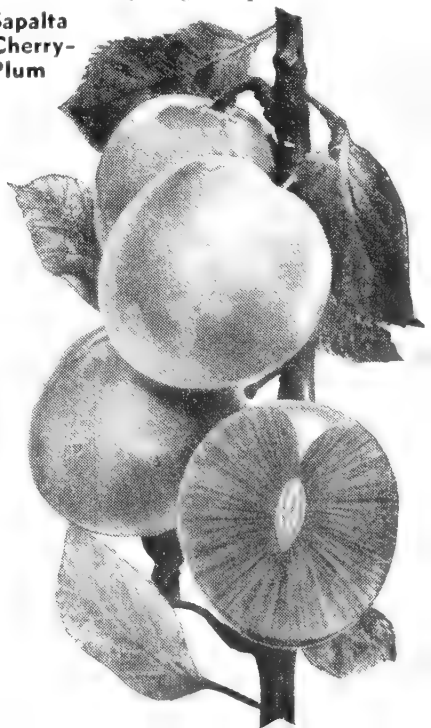

➤ **STANLEY PRUNE.** Almost identical to the shipped in Italian Prune, we like Stanley better because we get that extra flavor that comes from tree ripening. The large dark blue Prunes has a rich sparkling yellow flesh that is firm and very sweet. When you have tasted the fruit you'll wish you had planted more. The tree is perfectly hardy throughout southern Minnesota. Self-fertile. 4-5 ft., \$2.15 each; 2 for \$4.15; 3 for \$6.15. 3-4 ft., \$1.85 each; 2 for \$3.55; 3 for \$5.25.

➤ **PLUM POLLINIZERS.** To bear fruit, Pipestone, Superior and Redcoat need to be cross-pollinated. We have found South Dakota and Toka to be especially good pollinizers. Mt. Royal and Stanley Prune can be planted alone.

➤ **TOKA.** A brilliant red Plum with an unusual Apricot-Plum flavor. Absolutely tops for jam.

➤ **SOUTH DAKOTA.** Sweet and tasty, South Dakota is a good eating Plum as well as being a good pollinizer.

Sapalta
Cherry-
Plum

CHERRY-PLUM Hybrids

The Hybrid Cherry-Plum is one of the most easily grown and dependable fruits we have. Although crossed with the Plum, the fruits have retained more of the Cherry characteristics. They are large, meaty and absolutely wonderful for jam and sauce. They're good for eating fresh from the trees, too.

➤ **POLLINIZERS.** Select either Compass or Hansen's Bush Cherry—they are both good. In large plantings we use both.

➤ **COMPASS.** Excellent in its own right, as it makes very good sauce and jelly.

➤ **HANSEN'S BUSH CHERRY.** Small plants, grow only 3 to 4 feet tall. Easy to grow and where space is limited can plant a few feet from Sapa or Sapalta. Fruit is fair for preserves. 2-3 ft., 89c each; 2 for \$1.65. 18-24 in., 75c each; 2 for \$1.30. We pay the postage.

➤ **SAPA.** A very popular fine flavored Cherry-Plum that is excellent for canning, eating fresh, and in sauce or pies. The fruit is large with a small pit, thin purple-red skin and wine-red flesh.

➤ **SAPALTA.** Sapalta is a mouth watering sight as the large fruits, crowded together almost like grapes, begin to turn a deep purple color. The flesh is also a deep purple and the jelly and jam made from Sapalta is highly flavored and of the most intense purple we've ever seen. You'll have compliments galore when you serve it to your friends. Be sure to order a Compass or Hansen's Bush Cherry to act as a pollinizer.

CHERRY-PLUM PRICES (Except Hansen's Bush Cherry)

Mantet

Oriole

Beacon

Summer Varieties

ORIOLE ★★ ★

When August rolls around do you crave a nice juicy Apple? Then Oriole is for you. The earliest high quality Apple we know. Good for pies, too. For the first Apple, crisp, juicy Oriole is it. Very hardy.

MANTET

The Dominion Experiment Station at Morden, Manitoba, Canada, gives us this one. Mantet has exceptional quality. Ripens in August, and is an attractive, solid red Apple. Try it for making sauce with the skin on. It's as beautiful as it is delicious.

BEACON ★★ ★

Ripening in early September, Beacon is a stoplight. Having been featured for several years at the Minnesota State Fair, it has crowded all other Apples into the background. For early September, All-Red Beacon is the King of the Market.

RED VAN BUREN

Similar to Duchess, but superior in both color and quality. Ripens in early September. A beautiful Apple and one of the best early ones for pie.

ANOKA

A summer Apple that bears younger than any other we know of—often the second year after planting.

Oriole Collection

If you have room for only 3 trees—this is an excellent collection. Three of the finest Apples you could plant, this group will give you Apples for both eating and cooking over a long season.

Apples for Every Need Northern Rooted" Trees

of the Minnesota Breeding Farm

Winter Varieties

✓ PRAIRIE SPY ★★★

This is one of our favorites. A "dual-purpose" Apple, it is very good for both eating and cooking. Its unusual, almost nut-like flavor, sets it apart from all other Apples and will make your friends frequent visitors at picking time. Will keep all winter. Don't be without Prairie Spy—it's unusual.

✓ HARALSON ★★★

Haralson is one of the truly great Apples. There are now more Haralson grown in Minnesota than any other Apple. A large, red, solid, long keeping winter Apple; it is prized chiefly for its exceptional cooking qualities. Apple pie and Haralson are practically synonymous. It is our No. 1 choice—we've never known a better pie Apple. Those who like a hard crisp, juicy Apple, a little on the tart side—and there are many—swear by Haralson for eating. Haralson bears young and heavily. It is a tree that thrives in difficult places and is extremely hardy.

✓ FIRESIDE ★★★

For just plain mouth-watering quality, Fireside is tops. For eating fresh, it will make you forget Delicious. Crisp, juicy and sweet, it will keep all winter, unless, of course, you have too many Apple loving boys in the family.

✓ REDWELL ★★★

Redwell is one of our best winter Apples. It is solid red in color and very uniform in size. Best of all it is an annual bearer, which means you'll get Apples every year—not an overload one year and none the next. One of the hardiest.

✓ NORTHWESTERN GREENING

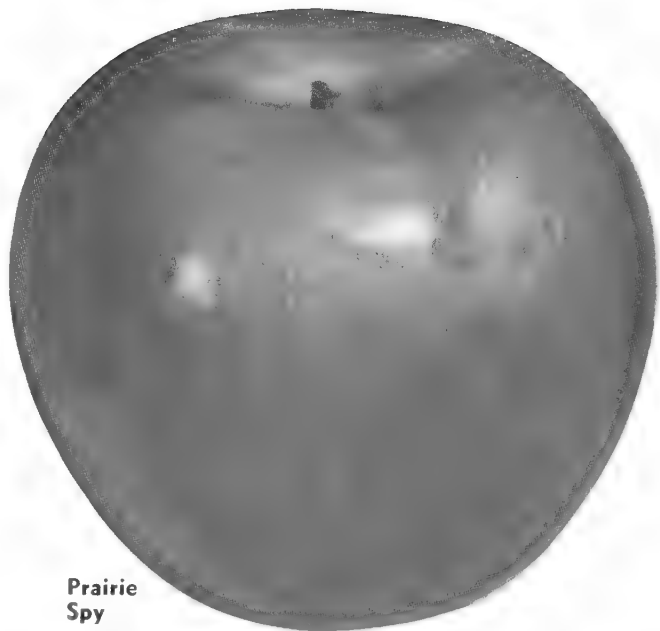

Another old-time favorite. The very large Apples are green when picked but turn to a very attractive pale yellow as they mature. Good for cooking—and its keeping qualities are unexcelled.

✓ DOUBLE RED DELICIOUS

America's best known Apple. A beautiful red, sweet winter eating Apple. High quality. Recommended in Southeastern Minnesota and warmer regions.

Yes! Money Does Grow on Trees

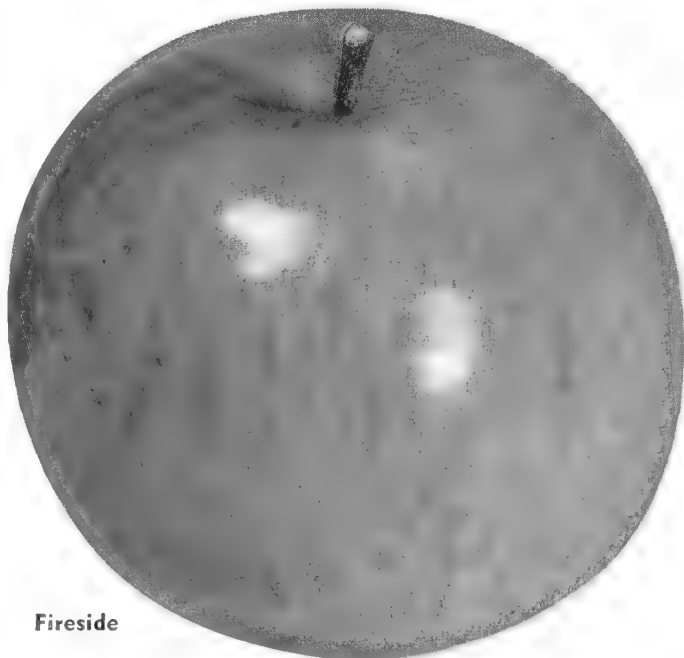

Fresh fruits are expensive, we all know that. Last fall Apples were selling for from \$4.50 to \$7.00 per bushel (wholesale) to grocers in Minneapolis. But when, for the price of a 1/2 bushel of Apples—or even less—you can buy the best Apple tree available—one that will bear bushels and bushels of Apples every year for many years to come, you can realize why we say: "Money does grow on trees." Because even the best tree costs so little, it pays to buy only Northern Grown trees that are "built" to live and bear in Minnesota. The same huge savings can be made by growing your own Raspberries, Strawberries, Cherries, Plums and other fruits. Fresh fruit is one of the best foods for children, and it costs so little to give them all they want when you grow it yourself.

MINJON ★★★

Minjon is a "Minnesota Jonathan." It ripens earlier, however, and is much hardier. A large Apple that is a deep rich red. Good for both eating and cooking, Minjon is gaining in popularity year by year.

VICTORY ★★★

To say that Victory is an improved McIntosh is probably enough to recommend it. Excellent quality for eating, sauce and in salads. Victory hangs to the tree better than McIntosh and bears much better in Minnesota.

CORTLAND

Cortland is an outstanding Apple for dessert purposes. Unexcelled for salads, its fine flavor and texture make it a choice Apple for eating and sauce during the fall and early winter.

LAKELAND ★★★

Here is a new Apple that just can't miss. A bit later than Wealthy, it is better on every count. Color is excellent—an all over bright red. Quality is high—very good for eating and especially good for pie. Best of all it's an annual bearer, which means that you get Apples every year instead of more than you can use one year and none the next. A sure winner.

WEALTHY

Probably the best known Apple throughout the Upper Midwest. Its sprightly flavor and juiciness has made it a favorite for years and years. Wonderful for sauce and pies. Ripens in late September, but can be used green soon after Labor Day.

Crab Apples

CHESTNUT

Chestnut is a favorite with children. It has excellent eating quality, and its large size would almost classify it as a small Apple. It is especially good in school lunches as it ripens in early September but keeps into November. Very good for pickling and sauce—and comes at a time when it's easier for Mom to do it. We think that bronze-red, crisp and juicy Chestnut is the best Crab of its type.

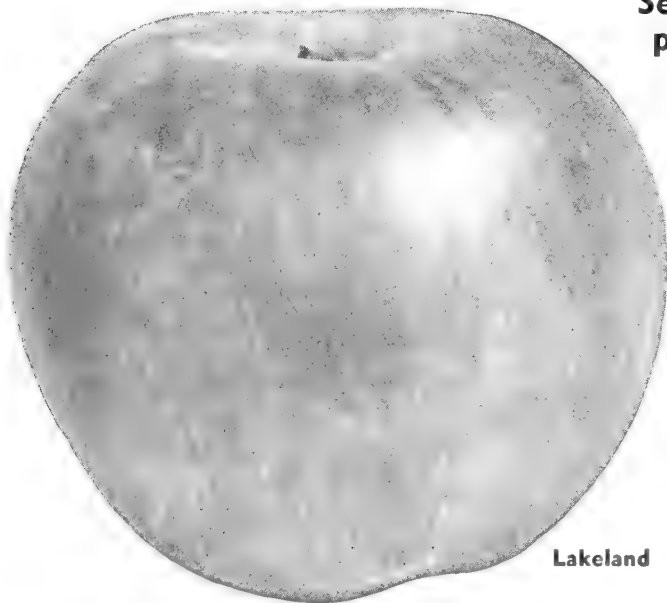

DOLGO

This bright, fiery red Crab is the best yet for jelly. Very high in pectin, it can be mixed with other fruits as well as used alone. The white blossoms and neat outline of the tree make it a handsome ornamental as well.

WHITNEY

This old favorite is still widely planted. Everyone likes it and it's early—ripening in August.

Are you thirsty for a PEAR?

Delicious, Juicy, Tree-Ripened PEARS can be yours!

Many folks still do not believe that they can grow Pears in the North. However, we do have hardy Pears that you can grow very easily. Because Pears have an upright habit of growth, they don't take up much room and will do well even in a lawn. Very ornamental, too, as the pure white blooms are out before Apples or Flowering Crabs and add an early gay note to your yard! Plant two kinds for cross pollinating and you'll have loads of fruit.

✓ PATTEN

A large, sweet, juicy Pear that will amaze you with its delightful flavor. We recommend it for Southern Minnesota and areas of like or milder temperatures.

✓ BANTAM ★★★

A Minnesota-developed variety with fruit the size of Seckel, excellent for eating or canning. The tree is a heavy, annual cropper. Hardy as a Duchess Apple tree and can be grown wherever Duchess can be grown.

PEAR PRICES

	Each	2 for
5-6 ft.	\$2.45	\$4.75
4-5 ft.	2.15	4.15
3-4 ft.	1.85	3.55

✓ PARKER ★★★

Parker is most dependable in Southern Minnesota and similar regions. We suggest trying it in favorable locations farther North, too. The fruit is medium large, fine grained and of excellent quality. We prefer Parker to Bartlett. Ripens in early September. Get some out this spring. When you start picking your own Pears, you'll be glad you did.

Parker

Home Grown GRAPES are Better

What could be nicer than a big bunch of sweet, vine-ripened Grapes from your own back yard? Grapes are easy to care for. Plant some along the back fence, or let them climb up a trellis but don't put off having your own. Plant some this spring.

✓ **BETA.** A tame Grape with the extra flavor and hardness of wild Grapes. Excellent for juice and jelly. Needs no winter protection.

✓ **CACO.** Most popular red Grape. Extra large, rich, and sweet. Delicious flavor. Winter cover needed in Minnesota.

✓ **CONCORD.** Bears large bunches of sweet, juicy, blue-black Grapes every year. Needs winter cover in Minnesota. See Fredonia.

✓ **FREDONIA.** Fruit is equal to or better than Concord, and ripens three weeks earlier, thus better for northern gardens. Requires winter protection in Minnesota.

✓ **PORTLAND.** A large white Grape of good quality. Requires winter protection in Minnesota.

✓ **VAN BUREN.** Newest and best of the sweet blue Grapes—and earliest to ripen. We have had reports that Van Buren is as hardy as Beta, but until more evidence is in from a wider area, we are still recommending winter cover in Minnesota. However, it appears that Van Buren is the hardiest of the sweet blue Grapes now commonly grown—and its quality is excellent, better than either Concord or Fredonia.

Indian Summer

Andrews' RASPBERRIES, BLACK-

INDIAN SUMMER *Everbearing*

The huge berries of Indian Summer will make your garden the envy of the neighborhood. Large and juicy with a rich Raspberry flavor, they are a special treat eaten fresh or frozen. The only Raspberry that keeps its color when canned makes it popular with the housewife. For something unusual try them mixed with Rhubarb. Once you have tasted Indian Summer you will always want it. Indian Summer grows vigorously, yields heavily, and requires little care. The fall crop will sometimes be too late for Minnesota but the summer crop is as large or larger than that of any other Raspberry we know. You can pick loads of delicious berries for your table with just 50 Indian Summer plants. For an ample supply for canning or freezing, too, plant one hundred. You'll save buying expensive fruit, have better berries and plenty of them.

CHIEF *Extremely Hardy and Early*

Recommended for early market, for severe conditions and farm gardens. Chief bears excellent quality fruit where all other kinds fail. Well known in the provinces of Alberta and Manitoba, Canada, where it has proven itself as one of the most vigorous and hardy varieties for northern regions. Chief has most of the good qualities of its parent, Latham. The berries are firm, bright red, not quite as large as Latham, but with a sprightly Raspberry flavor that makes it very desirable for jelly and jam. Very tough and easy to care for—Chief is our choice for planting if the conditions are severe.

Latham - still the "Peoples Choice"

Latham is the leading commercial and home variety of Red Raspberry. It is vigorous, easy to grow, a heavy producer, and hardy enough to stand sub-zero winters.

The fruit is large, dark red and firm; picks easily, keeps and ships well. Delicious eaten fresh, in sauce, jam, pies, or shortcake.

For the price of a crate of berries you can have enough plants to give you all the Raspberries you want for fresh fruit, canning and freezing.

You can cut your grocery bills—and get a lot of satisfaction, too—by enjoying your own home-grown fruit picked fresh for every meal. Your own berries have a better flavor, and there's no waste nor shrinkage.

Commercial growers report big yields and sure profits with Latham. Returns run as high as \$400.00 to \$800.00 per acre in a single year. For such results, plant genuine Latham (Redpath Strain) from Andrews' healthy "certified mosaic-free" stock.

Latham

SUNRISE *Early and Flavorful*

Sunrise, while very hardy, has performed better than any other Red Raspberry in the southern half of the United States where Raspberries do not normally grow well.

Dr. J. Harold Clark, formerly of the New Jersey Experiment Station writes: "The special value of Sunrise is its earliness."

Sunrise does ripen early—10 days ahead of Latham—and this commands a premium price on the market. Fruit is firm, fine textured, non-crumblly and possesses a fine flavor. Although Sunrise does better than any other Red Raspberry in the South, it is very hardy and seems to do well most any place in Minnesota.

BERRIES and BOYSENBERRIES

CUMBERLAND BLACKCAP

Our vote goes to Cumberland among the Black Raspberries as the very best. There have been others—but Cumberland still ranks at the top because of its glossy black color, fine sprightly flavor and the ease with which it is grown. Blackcap jam is something that should be enjoyed by everyone. They're easy to start, easy to grow.

THORNLESS BOYSENBERRY

A very unusual fruit, this huge berry—up to 2 inches long—is said to be a cross between the Loganberry, Dewberry, and Blackberry. This unusual berry is so seldom found on the market that many people have never eaten it. The flavor is as pleasing as it is individual. The berries are sweet and juicy. You can eat them fresh for weeks, they are wonderful for pie, and make excellent sauce, jam and jelly. The thornless kind is easy to work with. Don't put off having your own Boysenberries.

Ebony King

EBONY KING *Blackberry*

A sensational new Blackberry that is guaranteed to bear. The berries are very large, jet-black and luscious. Ebony King is a bush type Blackberry, very strong and will carry heavy loads of fruit. We believe Ebony King is the best Blackberry now grown and are certain that you will welcome a Blackberry that can be counted on to produce liberally.

Cumberland

ALFRED BLACKBERRY

Alfred as been the most widely planted Blackberry in this section of the country. The large, long, sparkling Blackberries are indeed a treat. Called the Coreless Blackberry, Alfred ripens earlier than Eldorado and is more productive.

SODUS PURPLECAP

A cross between a Red and Black Raspberry, Sodus is a very tantalizing combination of the best of both kinds. Deliciously flavored—with a zest unknown in other berries—it is one of the very best for jam and jelly. Many people like it better than either the Red or Black Raspberries. To see for yourself, just crush a cup of fully ripe Sodus, sugar lightly and pour over a dish of vanilla ice cream. Now there is a real taste appeal. The plants are very husky and easy to grow.

Sodus Collection

An excellent assortment of berries for the home garden.

Fresh from Your Own Garden

Rhubarb and Asparagus are about the most underrated, easy to grow, and easy to prepare garden products ever known. It has been established that Rhubarb is an outstanding source of Vitamin C—and the first one available in the spring. Asparagus has long been heralded as one of the best of all vegetables. It is easy to digest, and a very good source of minerals and vitamins. And if you like to freeze your vegetables—we know of nothing easier to handle.

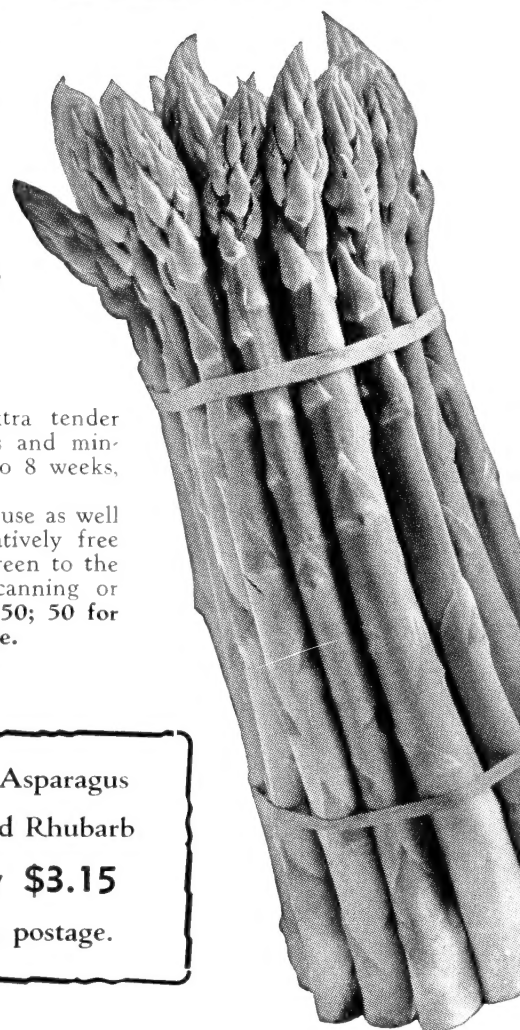

CANADA RED Rhubarb

The reddest of all Rhubarbs, Canada Red has large, tender, juicy stalks that are rich red all the way to the heart and even in the mid-ribs in the leaves. It is very sweet, yet when cooked it has a good snappy Rhubarb flavor. The skin is so tender you need not peel it. Very productive, Canada Red can be used throughout the season. Prices: 3 for \$2.55; 6 for \$4.65; 95c each. We pay the postage.

The New "No. 500" ASPARAGUS

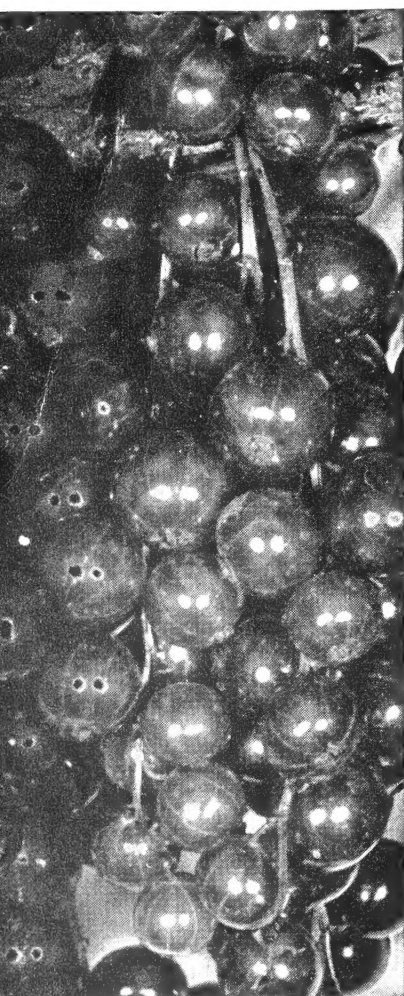

You'll love this new, extra green, extra tender Asparagus. It's just full of the vitamins and minerals you need. Eat all you want for 6 to 8 weeks, then can or freeze a winter's supply.

"No. 500" is top quality for commercial use as well as for home use. The tight heads, relatively free from a purple overcast, are a uniform green to the ground. Most desirable for fresh use, canning or freezing. Prices: 1-yr., heavy, 25 for \$1.50; 50 for \$2.65; 100 for \$4.85. We pay the postage.

SPARKLING JELLY and TASTY PRESERVES

are easily made from your own - - -

RED LAKE Currant

Nothing goes better on toast for breakfast than clear, sparkling, bright red Currant jelly. Everyone loves Currant jelly; and if you have never tried it, mix Currants with Red Raspberries for a special dinner treat. Red Lake is the best red Currant for the home garden. The large scarlet berries grow in long clusters, well filled to the tip. They ripen in early midseason, but hold over a long period to use or sell as desired. Currants are very easy to grow and are extremely hardy. Plant once and you'll enjoy them for years and years. Six bushes will give your family a good supply of Currant jelly and some for mixing with Raspberries as well. 2-yr., heavy, select plants, 75c each; 3 for \$1.95; 6 for \$3.55; 12 for \$6.00. We pay the postage.

PIXWELL

Gooseberry

You'll want to try the appetizing pies and preserves made from this new, almost thornless Gooseberry from North Dakota. It "picks well" because the berries hang on slender stems an inch below the branches. Its few thorns are rather soft, which makes picking a quick and easy operation. Pixwell carries heavy loads of large, fine quality berries. The Dominion Experiment Station at Morden, Manitoba, Canada, says: "Pixwell continues the leading Gooseberry for Manitoba conditions. It is exceedingly vigorous and always bears heavy crops." 2-yr., heavy, select plants, \$1.15 each; 3 for \$3.15. We pay the postage.

Andrews' STRAWBERRIES are Vitamin-Rich

Nothing tastes better than sweet, delicious, home-grown Strawberries picked "flavor-fresh" from your own garden—and frozen Strawberries are just as good. Dr. S. A. McCrory, head of the Department of Horticulture of South Dakota State College writes: "The Strawberry is the one fruit South Dakota grows that is equal to citrus fruit in Vitamin C content." Why pay high prices for fruit that is so easy to grow? Plant a good bed of Strawberries this spring.

ARMORE (June-bearing)

This big, beautiful, sunset-red berry proved tremendously popular last year. A BIG producer of BIG berries, Armore gives huge harvests after other June-bearers are through. In tests it proved more productive than 200 other varieties. A wonderful flavor and very sweet.

DUNLAP (June-bearing)

An old dependable variety that is still liked. Does well on most any type of soil.

FAIRFAX (June-bearing)

An older variety that still rates high with us. The berries are a deep, deep red all the way through, very sweet and high in flavor. Not for commercial use, but a home garden champion.

JUMBO (June-bearing)

A tremendous new midseason variety that is proving to be very popular. Jumbo is deep red all the way through and just full of real honey-sweet goodness. Berries are firm and rated superior for freezing. Records prove, too, that Jumbo is one of the heaviest yielding Strawberries known.

PREMIER (June-bearing)

A very dependable Strawberry. Blooms late so is seldom hurt by frost—yet bears early. Excellent for the commercial grower and good for the home garden. Berries are good quality, firm and attractive. Premier seems to do well most any place.

VERMILION (June-bearing)

Vermilion has undergone extensive testing and has passed with flying colors. Rates with the best in quality, production and freezing quality. Berries are medium large and a glossy red. Resistant to red stele and leaf spot. Early midseason.

WISCONSIN No. 214

(June-bearing)

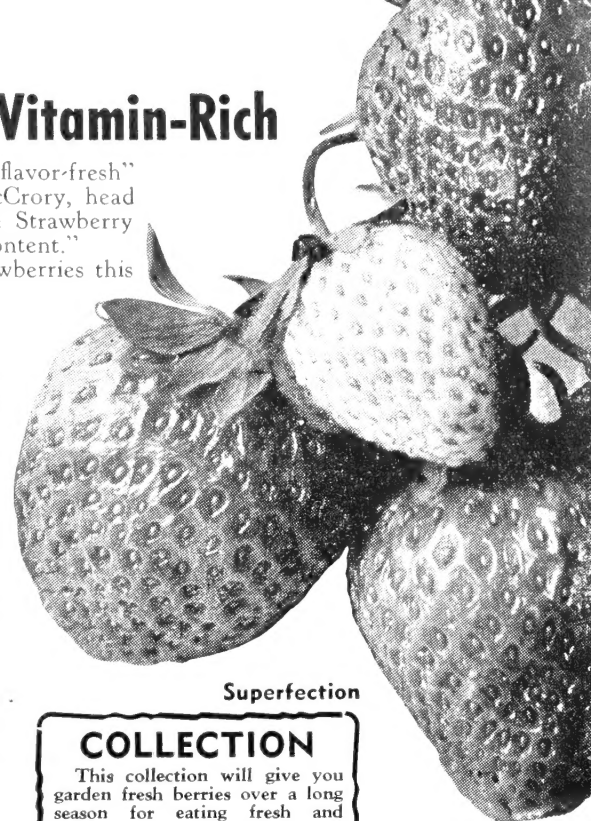

Here's a rare one that we think will become a favorite. An extra big, full-bodied berry that rates tops for freezing. Brilliant red—a good producer.

SUPERFECTION (Everbearing)

Newest everbearer from Michigan. A vigorous grower that will do very well most any place. Good producer of uniformly large fruit. We much prefer it to Gem.

20th CENTURY (Everbearing)

An outstanding everbearer that is highly recommended by experiment stations in many states. Second only to Red Rich, it rates very high in size, quality and vigor. The berries are bright red, of fine texture and excellent flavor. Usually 20th Century starts bearing 60 days after planting. We have had reports that it is the best everbearing Strawberry for light sandy soils.

Superfection

RED RICH

*The Sensational New Strawberry
All America is Talking About*

A sensational new Everbearing Strawberry! Many growers say that Red Rich has combined all the good qualities of everbearing Strawberries into one kind—sweetness, size, color, vigor and high yield.

A thousand words can't tell the whole story of Red Rich. The huge, deep red, honey-sweet berries make Red Rich just about the best Strawberry available today. The plants are big and husky with a tendency to keep the berries off the ground. **And Red Rich is really an Everbearer.** Planted in early spring, it will bear from June or early July all through the summer and into the fall. Because of the tremendous yields, fewer plants are needed. One commercial grower told us that he paid for his plants with the berries harvested from the fall crop the first year he planted them.

Red Rich is big, solid and firm all the way through. It ripens evenly and possesses an abundance of natural sugar. Ideal for freezing—best of all, it won't mush up when thawed. Don't lose a year with this amazing Strawberry. Plant this spring. George W. Nelson, Minnesota State Nursery Inspector, has the following to say of Red Rich: "I have examined hundreds of Strawberry varieties in my work as a nursery inspector in

Minnesota from 1914 to the present date. I have also grown from five to seven acres on my own farm at La Crescent since 1935. It is my opinion that the Red Rich variety is an outstanding development and is much superior, from every standpoint, to any everbearing variety now grown. Red Rich combines the high qualities (honey sweetness—red rich color) of its parents, Wayzata and Fairfax, with high yield and vigorous growth. Its flesh is firm and red clear through. The color is an attractive glossy red."

It took 15,000 seedlings before the finest features of the Wayzata everbearing and the Fairfax June-bearing were developed in Red Rich—but it was worth it.

Order early to be sure of your plants this spring.
